21-13 RATIO OF PATIENTS BY CLASSIFICATION OF DISEASES, TYPE OF MEDICAL CARE INSTITUTION
ACCORDING TO INPATIENT/OUTPATIENT (PER 100,000 POPULATION) (1999~2005)

Data are based on the Patient Survey (see page 672). The number of estimated patients who utilized the medical institution for one day designated by each medical institution during 3 days in mid October. The classification of injury and disease is based on the 10th Revision International Statistical Classification of Diseases and Related Health Problems.

21 – 14 ESTIMATED INPATIENTS AND OUTPATIENTS BY CLASSIFICATION OF DISEASES AND AGE GROUP (2005)

Data are based on the Patient Survey (see page 672). The number of estimated patients who utilized the medical institution for one day designated by each medical institution during 3 days in mid October. The classification of injury and disease is based on the 10th Revision of International Statistical Classification of Diseases and Related Health Problems.

21-15 DEATHS AND DEATH RATES BY LEADING CAUSES OF DEATH (1970~2007)

Data are based on the Vital Statistics (see page 30). Causes of death are based on the Causes of Death Classification for the Vital Statistics of Japan, which conforms to the 10th Revision of International Statistical Classification of Diseases and Related Health Problems. The data for 2005 and after are not comparable to those for 2000 and before, due to the change of the classification of causes, and of the rule of selecting the primary cause.
