# CHAPTER VII: DURATION OF RESIDENCE AND PLACE OF USUAL RESIDENCE FIVE YEARS AGO

#### 1. Duration of Residence

### About 90% of the population moved residence at least once after they were born.

Observing the proportion by duration of residence at the current domicile, the proportion of "Since birth" is 12.9%, "Less than 1 year" is 6.4%, "1 to less than 5 years" is 17.8%, "5 to less than 10 years" is 14.3%, "10 to less than 20 years" is 17.7% and "More than 20 years" is 30.9%. The total of these figures excluding "Since birth" is about 90%. This shows that the overwhelming majority of the population moved residence at least once after they were born.

According to the proportion of "Since birth" by sex and age group, the proportion among men is nearly equal to the proportion among women in each group aged 0 to 24. However, the proportion among men is higher than the proportion among women in each group aged 25 and over, and the trends show that these differences between men and women increases generally as age increases. (Figure 7.1, Table 7.1)

#### 2. Place of Usual Residence Five Years Ago

## The proportion of "Moved (current residence differs from residence five years ago)" exceeds 20%.

According to the proportion by place of usual residence with five years ago, the proportion of "Moved (current residence differs from residence five years ago)" (i.e. moved persons) exceeds 20% (22.8%). Breaking down by origin shows that "Within same prefecture" is the highest (16.5%), followed by "From other prefectures" (5.7%) and "From abroad" (0.5%).

Regarding the proportion of moved persons by sex and age group, the proportion is the highest in 30 to 34 years old age group in both men and women (49.3% and 52.4%, respectively), and the proportion of "From other prefectures" is also the highest level around this age group. However, the proportion of moved persons decreases as age increases in the 40 to 74 years old age group. (Figure 7.2, Table 7.2)

Figure 7.2 Proportion of the Moved Persons among the Population by Place of Usual Residence Five Years Ago, Sex and Age (Five-Year Groups): 2010

<sup>1)</sup> Calculates about the residence that they usually lived after they were born.
