

CHAPTER VI: DURATION OF RESIDENCE AND PLACE OF USUAL RESIDENCE FIVE YEARS AGO

1. Place of Usual Residence Five Years Ago

The proportion of “Moved (current residence differs from residence five years ago)” exceeds 20%.

According to the proportion by place of usual residence five years ago, the proportion of “Moved (current residence differs from residence five years ago)” (i.e. moved persons) exceeds 20% (21.9%). Breaking down by origin shows that “Within same prefecture” is the highest (16.0%), followed by “From other prefectures” (5.4%) and “From abroad” (0.4%).

Regarding the proportion of moved persons by sex and age group, the proportion is the highest in the 30 to 34 years old age group in both men and women (49.7% and 53.0%, respectively), and the proportion of “From other prefectures” is also the highest level around this age group. However, the proportion of moved persons decreases as age increases in the 40 to 74 years old age group. (Figure 6.1, Table 6.1)

Figure 6.1 Proportion of the Moved Persons among the Population by Place of Usual Residence Five Years Ago, Sex and Age (Five-Year Groups): 2015

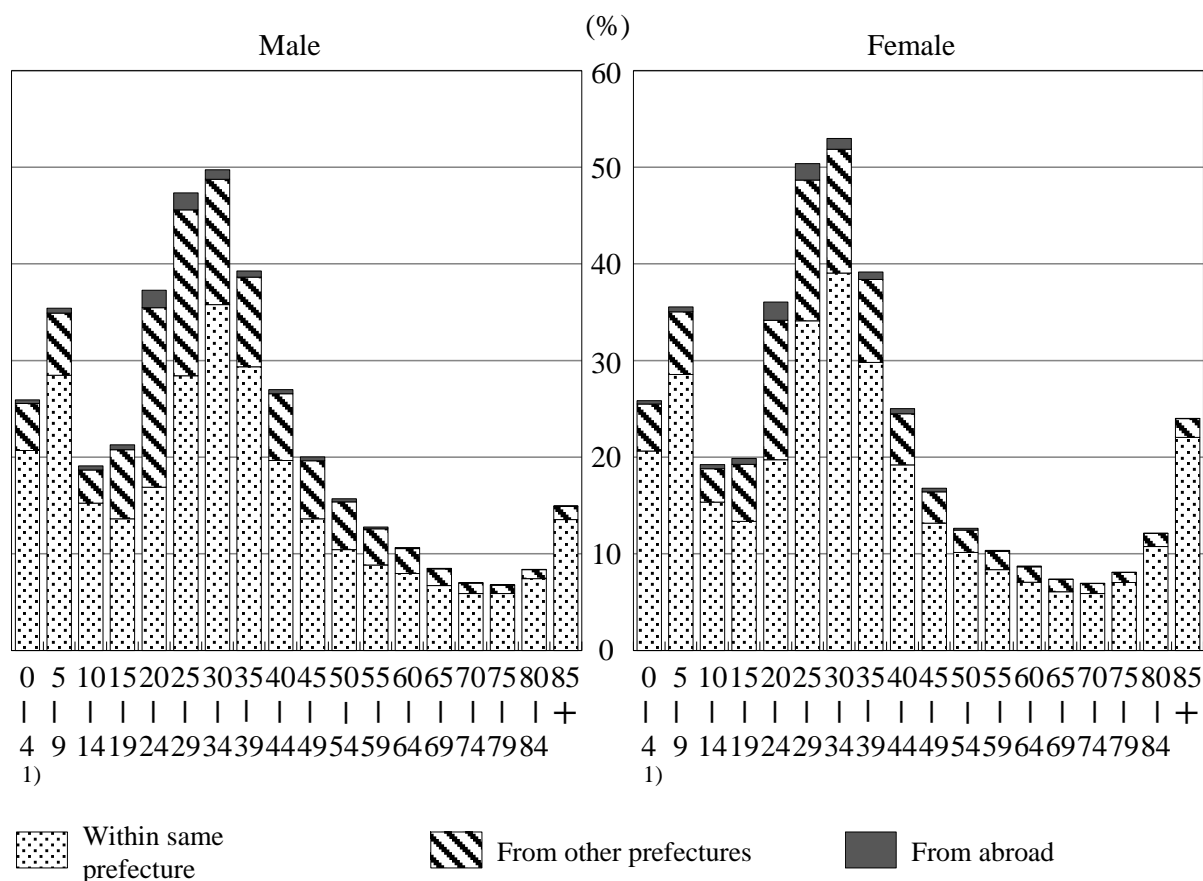

Table 6.1 Proportion of the Population by Place of Usual Residence Five Years Ago, Sex and Age (Five-Year Groups): 2015
