

List of Items

{ Explanatory Notes }

1) Survey classification by the Retail Price Survey(RPS)

Blank : Surveyed in all sample municipalities

- 1) : Surveyed in sample cities with population of 50,000 or more
- 2) : Surveyed in sample cities with population of 150,000 or more
- 3) : Surveyed in cities with prefectural government
- 4) : Surveyed in appropriate areas in each prefecture
- 5) : Surveyed in appropriate areas in Japan

2) Characteristics of items surveyed by the RPS

A : Items which consumers purchase mainly at their neighbouring areas, and the prices differ among areas

B : Items which are usually sold at representative commercial areas and large retail stores, and the prices differ among outlets

C : Items whose price differences are comparatively small among areas or outlets

D : Items of a single price or negligible price differences within the municipality or the prefecture

E : Items of a single price throughout the country or the region

S : Items whose prices are surveyed at any place of the municipality without fixing survey districts

House rent : House rent of household living in rented house

Accommodation : Lodging charges for general Hotels

POS : Items which calculated using prices are collected from the POS information data

3) Frequency of price survey by the RPS

: Three times a month (every 10-days in a month) Blank : Once, in the middle of the month

4) Method of price substitution, if not surveyed

Blank : Price substitutions are not performed.

A : (Classification by survey area 3)) Prices of cities with prefectural government are substituted for the unobserved prices of all sample municipalities in each prefecture

B : (Classification by survey area 2)) Prices of neighboring cities with population of 150,000 or more are substituted for the unobserved prices of sample cities with population of less than 150,000, sample towns and villages.

C : (Classification by survey area 1)) Prices of neighboring cities with population of 50,000 or more are substituted for the unobserved prices of sample cities with population of less than 50,000, sample towns and villages.

D, E : (Railway fares) Prices of enterprises chosen in each prefecture are substituted evenly for the unobserved prices of all sample municipalities in the prefecture.

F, T : (Fixed route bus fares, Taxi fares) Prices of designated cities by business areas and geographical conditions of enterprises are substituted.

H-M : (School fees) Prices of designated cities within a commutable district are substituted.

N, R : (As for the classification by survey area 4)) Prices of appropriate areas in each prefecture are substituted for all sample municipalities in the prefecture.

O : Single price throughout Japan is substituted for all sample municipalities.

G, P : Single price throughout Japan is substituted for all municipalities except in Okinawa prefecture.

Q : Single price throughout Japan is substituted for all municipalities except in Hokkaido and Okinawa prefecture.

5) model items

: Items whose average prices by city are calculated by model formulas* using prices of some specifications

* According to model formulas of 2015-Base Consumer Price Index
