(1) DNK	A project work on methodological and statistical problems in the compilation of PPIs has been initiated. The project is co-financed by Eurostat
(2) LTU	It has been decided to start with the implementation of Transport, Storage and Communication Services Price Indices. We will continue our investigation work in the mentioned area. Consultations with experts from EU countries are planned.
(3) BEL	At this moment Belgium collects data for a small amount of service sectors. This project has been started in order to get necessary input data to calculate the CCM index (Construction Costs Material Component).
(4) LVA	It is planned to start the development of the services price index in III quarter 2003.
(5) NZL	Statistics New Zealand is planning a redevelopment program, which is due to commence in July 2003. The initial program is planned for a three year to five-year period.
(6) BRA	Since 1998 Brazilian Institute of Geography and Statistics (IBGE) has been studying services activities through an Annual Survey on Services and we are planning to introduce a Monthly Survey on Services in three years' time. For that we also started studying the alternative to develop a Producer Price Index for Services which will be used as a deflator for its historical number series. Data on service production in selected activities are collected since 2000: road transport, railroad transport, water transport, air transport, computer services and telecommunication and audio-visual services. Product classification used in the survey is developed according to the CPC version 1.0 and will be used to build up PPIs for services.
(7) JPN	Service prices are collected for compiling the Corporate Service Price Index (CSPI), which is the price index that aggregates the transaction prices between companies.
(8) LUX	Works to develop and to implement services producer price indices have begun – in STATEC and with the help of Planistat Luxembourg SA in March 2003 and a pilot-study will normally be carried out in 2004.

Notes to Tables 2 and 3

Table 2 Notes

Summary of responses to inquiry on prices by ISIC activity

1. GBR	List prices used only when discounting not prevalent.
2. GBR	External supplier - contract prices for comprehensive fleet maintenance services.
3. NZL	Some composite services are priced, such as panel beating and painting.
4. NZL	Some service bundles are priced, such as car lease contracts which include maintenance.
5. FIN	Cost index for road transport of goods.
6. JPN	Information on the number of price quotations per period is not available for any ISIC Group or Class because only representative monthly transaction prices of principal companies are surveyed. The total number of price quotations a month is about 3,000.
7. GBR	Only hotels and motels with restaurants - business rates.
8. GBR	Conference delegate package deals.
9. NZL	CPI items used as proxy.
10. FIN	Uses CPI components.
11. GBR	Only provision of workers canteens and airline meals - charges to businesses.
12. GBR	Comprehensive catering plus canteen services only.
13. GBR	Business passenger fares (rail fares for Group 601; air fares for Group 621).
14. GBR	Freight by rail : contract prices.
15. GBR	Transportation plus handling.
16. NZL	"Other" refers to the average price for several classes of freight.
17. GBR	Contract prices for combined transport and warehousing services.
18. USA	Selected additional charges are sometimes bundled with the transport charge.
19. USA	See table below
20. AUS	Diverse range of activities covered from simple point to point transport of goods to full logistics service.
21. AUS	Service bundle including services such as freight plus warehousing plus stock control.
22. NZL	Some composite services such as transport and handling/warehousing are priced.
23. NZL	Service bundle refers to delivered bulk gas and petroleum prices.
24. GBR	"Other" refers to average prices for commercial vehicle ferries.
25. AUS	Covers international sea freight.
26. AUS	Covers coastal water transport of freight.
28. USA	Security brokers, dealers and investment banking companies
29. AUS	Covers domestic air freight.
30. AUS	Covers international air freight.
31. NZL	Only some service bundles such as package travel are priced.
32. NZL	Some composite services such as container hire and handling are priced.
33. USA	In/out charges bundled with storage service.
34. AUS	Diverse category covering simple self storage to more complex records storage and management. Warehousing can include handling and distribution.
35. NZL	Percent of commission fees converted to dollar value.
36. GBR	Only freight forwarding activities.
37. GBR	Total charge for arranging transportation of goods.
38. GBR	External supplier - national posts parcels.
39. GBR	External supplier - total charge for representative baskets of services.
40. USA	Local service bills are bundled.
41. AUS	35 respondents with 5 specs each
42. CAN	Telephone services to business: telephone services by plan. Average revenue per minute by type of service
43. CAN	Television broadcasting of advertisement price index under development. Advertising revenues by station.
44. NZL	Bank margin on borrowing/lending converted to dollar value and deflated by CPI.
45. NZL	"Other" refers to brokerage based on stock exchange index movements adjusted for percentage commission rates.
46. USA	Expenses and utilities are bundled with leases.
47. AUS	Refers to commercial property operators and developers.
48. FIN	House price index, dwellings in old index.
49. NLD	Long-term leasing only
50. NZL	Real estate commission fees in percentage inflated by rental index to derive value.
51. GBR	Contract car hire bought from a private company.
52. USA	Selected required services bundled with rental services.
53. AUS	Simple service corresponds to renting.
54. AUS	Composite service corresponds to a fully maintained operating lease.
55. NZL	Some composite services such as car leases with service contracts or crane hire with operator are priced.
56. AUS	Fully maintained operating lease. ISIC Classes 7121 to 7129 are collected under the 'Plant Hiring and Leasing'
57. NZL	Description for ISIC group 7121 includes prices collected for groups 7122, 7123 and 7129
58. NZL	Some composite services such as machinery including operator or machinery including maintenance are priced.

59. GBR	Commercially produced index of property values and rental payments is used.
60. GAN	Thirty six firms surveyed for one type of service.
61. CAN	Advisory, predesign and project management are included in the price index.
62. GBR	Only supply of software and contract price for outsourcing of comprehensive IS services.
63. USA	Software sold in suites are bundled.
64. GBR	On-line access services.
65. GBR	Computer processing services.
66. GBR	Disaster recovery services.
67. USA	Selected bills for various hourly wages are bundled.
68. POL	service bundle is applied to freight transport by railway
69. GBR	Model package of services as specified by contributor.
70. GBR	Including some charge-out (external fee) rates.
71. USA	Multiple services transactions are bundled.
72. FRA	Price of a "mission" carried out for a client. "Missions" are classified beforehand.
73. GBR	Three separate activities, all under development - architects, consulting engineers and quantity surveyors.
74. USA	Project input costs are bundled.
75. AUS	Service bundle priced for surveying only. Bundles may vary from job to job.
76. USA	Selected contracts for multiple advertisements are bundled.
77. GBR	Mark-up prices for recruitment and transaction prices for provision of personnel.
78. GBR	Some contract prices for composite security services are priced.
79. FRA	Real contracts which may include one or several types of security services are priced.
80. NZL	Some composite services such as security storage and armoured transportation are priced.
81. GBR	Some contract prices for composite cleaning services are priced.
82. USA	Selected contracts for multiple services are bundled.
83. AUS	Covers pest control.
84. AUS	Covers cleaning services.
85. FRA	Real contracts including one or several types of cleaning services are priced.
86. GBR	Translation services.
87. GBR	Direct marketing/secretarial services.
88. NZL	Plus CPI items.
89. FIN	EC index of purchase prices of inputs in agricultural production.
90. GBR	Prices are collected and published separately for waste disposal and for sewage services (the latter provided by an external supplier).
91. NZL	Some composite services such as bin hire and rubbish disposal are priced.
92. POL	Prices expressed in USD are converted to PLN with use of the current USD exchange rate.
93. POL	Prices of services for freight transport by road are collected according to the NACE class 60.25 - Freight transport by road.
94. POL	In case of foreign contractors – price depends on the exchange rate of Euro.
95. POL	In passenger transport (foreign lines) – prices are settled taking into account the exchange rate of Swedish Crown; in freight transport – having in mind the current USD exchange rate.
96. POL	In negotiations with foreign partners – prices are settled taking into account exchange rates.
97. POL	Prices expressed in USD (international lines) – based on regulations of IATA. Prices expressed in PLN – taking into account the current USD exchange rate.
98. HKG	? Hotel lodging services ? Food/beverage serving services offered by Chinese restaurants / non-Chinese restaurants / bar / lounge of hotels and boarding houses
99. HKG	Includes: Tramways and railways (extracted from CPI system), Motor buses and Maxicab (extracted from CPI system), Land freight transport by goods vehicle (125 price quotations), Car park services (63 price quotations), Vehicular tunnels (extracted from CPI system), Taxis and public light buses (122 price quotations)
100. HKG	Includes: Ship owners of sea-going vessels and operators of sea-going vessels (62 price quotations), Ship owners or operators of HK-Macao vessels (extracted from CPI system), Harbour ferries (extracted from CPI system), Container terminals, haulage of container and container leasing (164 price quotations), Sea cargo forwarding services (205 price quotations).
101. HKG	Includes: Hong Kong based airlines and helicopter companies (30 price quotations), Supporting services to air transport (43 price quotations), Air cargo forwarding services (276 price quotations).
102. HKG	Sub-divided into services related to construction and real estate activities (156 price quotations) and other engineering and technical services (49 price quotations)
103. HKG	Includes also ISIC 7413 and 7414.
104. MEX	ISIC 7121,7122,7129 combined
105. DEU	ISIC 512-519
106. DEU	521-523, 525 based on prices collected for CPI purposes
107. DEU	Based on prices collected for CPI purposes
108. SWE	ISIC 721, 723, 724 and 729 are measured together (800 price quotations)
109. ESP	Base year 2001, sample size 6000 establishment in winter and 8500 in summer
	Published monthly by region, type or rates and type of hotels.
108. AUS	National Accounts are still using no. guest nights as a volume indicator, however the Accommodation PPI has been recently developed ready for use by National Accounts.

109. JPN	Professional services (certified social insurance and labour specialist services, certified real estate evaluation services, certified administrative procedure specialist services, certified real estate assessor services for registration)
----------	--

Table 3 Notes

Summary of responses to inquiry on prices by CPC product

NOTES

1. NZL Uses the CPI as proxy.
2. AUS Only a rail freight index is releasable - passenger services (64111) unpublished.
3. AUS Only a road freight index is releasable.
4. AUS May be combined with unpublished passenger services in the future.
5. AUS Only an "other than grain handling storage" index will be released.
6. GBR Consideration is being given to using established CSPI for national post parcels possibly combined with the RPI postage measure adjusted for bulk-mailing discounts to cover business letters
7. CAN For wired long distance telecommunication services to business only.
8. USA Not currently published.
9. USA To begin July 1999.
10. AUS Only one plant hiring or leasing index is releasable.
11. CAN One index that covers all CPC activities.
12. AUS Only a global index is releasable.
13. AUS Market research only.
14. CAN Canada produces indices by type of project/client market for all engineering services
15. AUS Covers these CPC classes in concept but only one security services index is releasable.
16. AUS Covers these CPC classes in concept but only one commercial cleaning services index is releasable.

table 4 new publications and methodological documents

New data publications

CAN	"Traveller Accommodation Services Price Indexes" from August 2000
CZE	The publication 'Price indices of market services in business sphere' (in Czech language) is released monthly on 25th day after the month to which data relate. The publication contains information on trends in price indices of market business services, graphs and comments. Indices calculated in a derived way from the constant base December 1999 are also shown. That concerns indices with price base – previous month = 100, corresponding period of the last year = 100, 2000 average =100, ratio of two rolling averages of the December 1999 index. On quarterly basis, selected average prices of services for CZ-CPA 70, 71, 72 and 74 are usually published. It is possible to obtain this publication mentioned via both the Information Services Department in printed and electronic form and the CSO web site - www.czso.cz in electronic form.
USA	New prices series are published on BLS website
HKG	11 quarterly PPI series with base year 2001=100 are published in the Hong Kong Monthly Digest of Statistics published by the C&SD, Hong Kong, China. Since July 2002 base year 2001. Previous set of series published since July 2000 base 1999
GBR	Quarterly at www.statistics.gov.uk/cspi and in "Economic Trends", which is also a quarterly publication
DEU	1. annual publication on prices for transportation and telecommunication 2. monthly data in the data shop of destais (payable)
MEX	Not new but data can be found on at www.banxico.org.mx in Spanish (not yet in English)
FRA	Car rental services (short-term rental only), rental of construction and civil engineering equipment, engineering services, security services, cleaning services and accounting services in Bulletin mensuel de la statistique (INSEE). Also on http://indicespro.insee.fr . Indexes for advertising and computer services will probably be published before the end of 2003.
POL	Services producer price indices for the "Transport, storage and communication" section are published in the following the CSO publications: - "Statistical Yearbook of the Republic of Poland" - annually - "Statistical Bulletin" - monthly - "Prices in the National Economy" - monthly - "Prices in the National Economy in 2002" - annually
SWE	CBS Publication PR 10 SM contains annual PPI data with prices for ISIC 55.1, 62.1 and 70.3 since 1997
CHE	Service prices are integrated into the monthly publication of the Swiss Federal Statistical Office: "Indice des prix à la production et à l'importation".
NOR	architectural, civil engineering and hotel prices on www.ssb.no
AUS	Services PPIs are contained within the ABS publication: Producer Price Indexes, Australia (ABS Catalogue no:6427.0) More detailed information is available via our website: www.abs.gov.au under Publications, Producer Price Indexes Australia cat. no. 6427.0 and Time Series Spreadsheets 6427.0 Tables 22-25 and 45-46
NZL	Quarterly Producers Price Index release: Hot off the press on the Statistics New Zealand website
JPN	For the monthly index release, we publish Monthly Report on the third working day counted from the 21st of the following month, in principle. At the same time, we revise the Long-Term Time-Series Data, which cover all index series of the CSPI. Further, we provide Explanation of the CSPI, and Notice. All publications are available at the Statistics corner for Prices of the Bank of Japan website (http://www.boj.or.jp/en/stat/stat_f.htm).
KOR	The indices are put in 'Montly prices' and 'Monthly Bulletin', published by The Bank of Korea

Recent methodological documents

CHE	Federal Statistics Office: "Produzentenpreisindex für den Güterverkehr, April 2001=100", Neuchâtel 2002. French version will be available autumn 2002 (currently just in German, summary in French and Italian)
CAN	"A Producer Price Index for Accounting Services" presented to VG2000
JPN	The next revision of the CSPI will be published at the end of 2004. We released the next preliminary revision plan of the CSPI in May 2003, and are now asking for comments on it from the public. We will decide a final plan for the next revision of the CSPI, which will be released sometime by the end of 2003. In the preliminary revision plan, some services (such as Internet advertising, which are in #83620 of the CPC and in #7430 of the ISIC) were picked up as candidates for newly adopted items of the CSPI. While a few services (such as pager services, which are in #84120 of the CPC and in #6420 of the ISIC) were selected as candidates for abolished items of the CSPI. We will present details of our preliminary revision plan at the Voorburg Group Meeting this year in Tokyo.
FRA	Three papers are prepared for the 18th Voorburg Group meeting in Tokyo (PPI for facilities management, PPI for prepackaged software, The French approach for measuring price's evolution in services in France).
SWE	Report 1: Service Price Index for Car Rentals, SE-SIC 92 group 71.100, Norman V. & Picone G. (2001) Report 2: Service Price Index for Computer Services, SE_SIC 92 group 72, Cerda M. & Glanzelius M. (2001) Report 3: Service Price Index for Architectural and other Engineering Services, SE-SIC 92 group 74.20, Bylin M. & Ribe M. (2002) Report 4: Service Price Index for Accounting and Auditing Services, SE-SIC 92 group 74.12, Gerestränd E. & Leonardsson M. (2003) Report 5: Service Price Index for Legal Services, SE-SIC 92 group 74.11, Cerda M. (2003) All the papers are available at: http://www.scb.se/statistik/pr0801/pr0801eng.asp (English version) http://www.scb.se/statistik/pr0801/pr0801.asp (Swedish version)
DEU	Supplied to OECD reports (mainly in German) on PPIs for Transport via railways, Water transport, Air transport and Post and telecommunication.
GBR	Supplied to OECD recent report produced for Eurostat
POL	A change in methodology since July 2001 regarding the introduction of weights for base year 2000 is documented concisely in "Prices in the National Economy"
SVK	Supplied to OECD an overview of deflators used by Slovak Republic entitled "Estimation Methods at Constant Prices"
NLD	A short description of the car lease survey (case study) was written on the request of a member of the TEG-PPI for the PPI manual. Contributions (appendices) to principal Voorburg Group papers on engineering and road haulage were submitted to the authors (forthcoming).
ESP	"ÍNDICES DE PRECIOS DESDE LA PERSPECTIVA DE LA OFERTA" a methodological note on the hotel price index was provided to OECD in Spanish.
USA	Methodological synopses provided to OECD in 2002: US SIC 4833, 7372, 5531, 5541, 5551 and 5561 - Data Processing Services, Television Broadcasting Stations, Gasoline Service Stations, Boat Dealers, and Recreational Vehicle Dealers. Methodological synopses provided to OECD in 2003: US SIC 6282 and 6411 - Investment Advice and Insurance Agencies and Brokerages Other methodological documents on the Investment advice industry, the Liquor store hedonic model, and the Prepackaged software and data processing
NOR	Eng, Andras Kruger: Prisindeks for tenesteytande naeringar, Rapportar 2001/10 SSB (in Norwegian only)
HKG	A feature article on PPI of service industries were published in the Hong Kong Monthly Digest of Statistics Feb 2003 issue.
AUS	Producer Price Indexes has not released any methodological publications since July 02, however the ABS has contributed papers to the 17th Voorburg group meeting in Nantes in September 2002 and the Ottawa group meeting in Paris in May 2003. Links to both the Voorburg and Ottawa group websites: http://www.insee.fr/en/nom_def_met/colloques/voorburg/voorburg_sessions.htm#price http://www.insee.fr/en/nom_def_met/colloques/ottawa/ottawa_papers.htm The following papers were presented by the ABS at the 17th Voorburg group meeting: Producer Price Index for Computer Services Development of a producer price index for Other Financiers Quality Adjustment in Service Industry Producer Price Indexes Our Prices Development team presented a draft paper entitled E-commerce and Data Capture Opportunities for Price Indexes at the 7th Ottawa group meeting held in Paris in May 2003. This paper was authored by Keith Woolford and Andrea Grcman.

Table 5**What are the main purposes for your collection of services PPI data and who are the principal users?**

CHE	As an economic indicator (measure of inflation and a short-term indicator) As a deflator of output For analysis (macroeconomic, comparative analysis of industries and products) Practical uses (for indexation of prices in budgets, contracts, and pricing of tenders etc)
CAN	Principally for System of National Accounts Branch of Statistics Canada They use indexes for deflation purposes
NLD	For National Accounts within Statistics Netherlands For other economic agencies, for industry associations and firms
USA	Input for calculation of real GDP and productivity The BEA uses appropriate PPI series to double deflate nominal revenues to determine - real output on a gross product originating basis. The BLS Office of Productivity and Technology uses PPI data to help calculate industry productivity measures These derived economic measures are of critical importance for economic analysis and policy setting. The expansion of the PPI into services has already permitted significant improvements in the measurement of real output - and productivity for service industries with significant time series.
NZL	To provide deflators for the New Zealand national accounts To provide a measure of price change for businesses
AUS	National Accounts, Industry Associations, to complete economy wide Stage of Production Price Index
HKG	To improve the quality of national accounts with wider range of deflators of output series An economic indicator for monitoring price movements of local output and evaluating price competitiveness vis à vis similar products in other territories Users: National Income Branch CSD, HKG China, economists & policy makers in Government and business, academics etc
GBR	An indicator of inflation in services sector For national accounts, a deflator of service sector output in GDP and for the index of services output An information tool for business
SWE	For national accounts, the services PPI aim to provide robust deflators for the calculation of GNP
MEX	To complete the national accounts structure, with prices for specific services not found in CPI Users are in both the public and private sector
JPN	The main purpose of compiling the CSPI is to investigate price movements that sensitively reflect the supply and demand conditions of individual services, with a view to facilitating the analysis of macro- and micro-economic conditions. The indexes of less aggregated levels also have a role as a “deflator” that transforms nominal output values into real quantities. Economists, market analysts can use the index to capture the economic situation of Japan from the viewpoint of prices. Of course, the Bank of Japan uses the index for judging the economic situation of Japan and for conducting monetary policy. While the Cabinet Office, in the case of Japan, uses the index as a “deflator” for compiling the SNA.
FRA	For French public statistical system: price deflated, national accounts, short-term information on economic activity For firms: information on markets relative to their business
FIN	Main users: National Accounts and trade unions
POL	Deflators for national accounts in the part concerning industrial production; auxiliary data for compiling CPIs; information on development of services prices for such users as banks, research institutes, etc.

Table 6
Use as
Deflators

HKG	Most of the PPI series released in Annex II are used as deflators for discounting the effect of price change so as to derive the constant price value added of these economic activities. They are used for deflating gross output measures, e.g. business receipts of various economic activities.
CHE	Not yet used as deflators as price series too new
DEU	<ul style="list-style-type: none"> - freight transport by road: calculation of freight rates per km (separately for long distance traffic and local traffic) for ten categories of goods according to information provided by the federal office for the freight transport - freight transport on inland water: same methodology as for freight transport by road. - Freight transport by railway: Information from Deutsche Bahn AG for turnover and transport of goods in ton kilometer for various categories of goods. <p>(More detailed information available in German language)</p>
POL	<p>The following Producers Prices Indices for services are used in Polish national accounts:</p> <p>1. Construction and production (NACE F) according of the following groups:</p> <ul style="list-style-type: none"> - site preparation (NACE 45.1), - building construction; civil engineering (NACE 45.2), - building installation (NACE 45.3), - building completion (NACE 45.4), - renting of construction or demolition equipment with operator (NACE 45.5). <p>2. Transport services (NACE I) according to detailed groups:</p> <ul style="list-style-type: none"> - land and pipeline transport (NACE 60), - water transport (NACE 61), - air transport (NACE 62), - auxiliary transport activities, tourism organisation (NACE 63), - post and telecommunication (NACE 64). <p>They are used for deflating both gross output of activities included in construction and transport and intermediate consumption of such services by all branches in national economy.</p> <p>PPI are used for both accounts: Quarterly on the bases: <ul style="list-style-type: none"> - year 2000 = 100 - previous quarter = 100, - corresponding quarter of previous year = 100 Annually on the bases of: <ul style="list-style-type: none"> - previous quarter = 100 </p> <p>For deflation of the other market services the CPI are used.</p> <p>Any extend of the use of PPI for services in national accounts are not planned for the near future.</p>
NLD	: PPI's are used in NA as deflators.
USA	<p>For use of deflators see http://www.bea.doc.gov/bea/ARTICLES/2002/10October/1002UpdatedMeth.pdf</p> <p>The Producer Price Index is a principal input for the calculation of real GDP. The Bureau of Economic Analysis uses appropriate PPI series to double deflate nominal revenues to determine real output on a gross product originating basis. The Survey of Current Business article specified in the web address provided above is updated yearly and Table 2 specifically lists the areas of Real GDP where the PPIs for services are used as deflators.</p>
NOR	List of deflators provided to OECD more information from svein.lasse.rogeborg@ssb.no
FRA	PPIs are used as deflators(annual national accounts) for : renting of construction and civil machinery equipment (code ISIC 7122), renting of land transport equipment (7111), accounting (7412), security activities (7492), bulding cleaning activities (7493)and engineering activities (7421).

AUS	<p>The National Account uses these indexes for quarterly processing especially for the Trading and Production team. The Production team in the National Accounts has utilised the PPI price to derive deflators for turnover. A Fame process was created to compile deflators for Manufacturer's Turnover and Other Turnover series sourced from the quarterly business indicators (QBIS). For the most part, QBIS is sampled at the 2 digit level which is mainly the level we revalue, but Road Transport and Wholesale are sampled at a more detailed level. The Trade assembly makes extensive use of EPIs, IPIs, indicator series, PPI services. PPI service indexes are used to derive correct volume estimates especially for the Services export.</p> <p>Some of these indexes are also used to create deflators for the Annual supply use table because the input-output generally require indexes at the 4 digit level.</p> <p>A variety of service industry price indexes are utilised by national accounts for deflation purposes. The level at which the deflation process occurs is dependent upon the level of detail of the current price information.</p>
NZL	<p>Some service deflators are used. Eg communication services, property services, personal and community services. Details of how it is used can be made available later.</p>
JPN	<p>Service price indexes of the CSPI compiled by the Bank of Japan are used as deflators in Japan's national accounts compiled by the Cabinet Office. The Cabinet Office matches service price indexes of the CSPI with appropriate components of the national accounts as deflators.</p>
SWE	<p>All producer price indices are being used as deflators in National Accounts (quarterly GDP)</p>
GBR	<p>Service producer price indexes are currently used as deflators in National Accounts (quarterly GDP and the monthly Index of Services) and the document described below describes the evaluation process employed. The service industries where data are presently used for deflation purposes are:</p> <ul style="list-style-type: none"> ? Other non-scheduled passenger land transport (bus and coach hire only); ? Freight transport by road; ? Courier activities other than national post; ? Renting of construction and civil engineering machinery and equipment; ? Investigation and security activities (security services only); ? Building cleaning activities (industrial cleaning); ? Photographic activities (commercial film processing only); ? Sewage and refuse disposal, sanitation and similar activities (waste disposal only); ? Repair and maintenance of motor vehicles; and ? Business telecommunications. <p>A further 17 industries have been identified as medium to high priority for future use as deflators as follows: (Used from late 2003 onwards.)</p> <ul style="list-style-type: none"> ? Hotels; ? Canteens and catering; ? Freight forwarding; ? Market research ? Technical testing; ? Recruitment and employment agencies; ? Direct marketing and other secretarial services; and, ? Translation and interpretation services. <p>(Proposed for use from 2004 onwards.)</p> <ul style="list-style-type: none"> ? Computer services; ? Legal services; ? Accountancy; ? Management consultancy; ? Architectural services; ? Consulting engineers; ? Quantity surveyors; and, ? Advertising. <p>For more information see "CORPORATE SERVICES PRICES INDICES AND THEIR FITNESS FOR USE AS DEFLATORS IN NATIONAL ACCOUNTS" (supplied to OECD) by Nick Palmer and Steve Drew</p> <p>For an overall view of the sources and methods used for calculation of UK GDP output approach see "Gross Domestic Product: Output Approach" Peter Sharp GSS Methodology Series no. 15</p>
