FOREWORD

It is our great pleasure to officially release the final results of the 2014 Cambodia Inter-censal Economic Survey (CIES2014) which was conducted from 1 to 31 March 2014 with 1 March 2014 as the reference date, covering the entire territory of the Kingdom of Cambodia. The CIES2014 is a sample survey and is an inter-censal survey which is to be conducted between two decennial censuses, that is, between the 2011 Economic Census and the 2021 Economic Census. The preliminary results were released in September 2014 prior to the final results.

Under the legal basis of the Statistics Law, the CIES2014 aims at compiling basic statistics on establishments and enterprises in the whole Cambodia's territory. The final results provide information on the current situation of establishments in Cambodia and serve for various users such as policy makers, government officials at both national and local levels, international organizations, NGOs, private sectors, researchers, and development partners.

The final results will contribute to achieving the socio-economic development goals of the Royal Government in supporting evidence-based planning. I am sure that the public will be very much benefitted to use the CIES2014 results to the full extent possible.

We express our deep sense of gratitude to the Royal Government of Cambodia led by **Samdech Akka Moha Sena Padei Techo HUN SEN**, Prime Minister of the Kingdom of Cambodia. His constant support to the CIES2014 brought successful completion of both enumeration and data processing. Our thanks are due to the Ministry of Planning (MOP), the National Institute of Statistics (NIS) and line ministries such as the Ministry of Economy and Finance, the Ministry of Industry, the Ministry of Commerce, the Ministry of Interior and other relevant government ministries and institutions which facilitated our activities and led to the success of the CIES2014.

I gratefully acknowledge technical and financial assistance provided by the Government of Japan and Japan International Cooperation Agency (JICA). Our deep thanks are due to Mr. Fumihiko Nishi, Chief Adviser of the JICA Project on Improving Official Statistics in Cambodia, Dr./Mr. Nobuo Hirohata, Mr. Akihito Yamauchi, and other JICA experts of this project, who made all the best efforts in the complete success of the implementation of the CIES2014.

We thank Governors of Phnom Penh Municipality and Provinces, and Chiefs of Districts as well as Chiefs of Communes and Villages, who provided administrative facilitation for the implementation of the CIES2014.

The CIES2014 was a great statistical exercise, and its successful completion was possible with the total help and cooperation received from one and all. The major share of the credit for the success of the CIES2014 should go to the entrepreneurs of small, medium and large enterprises who paid busy and valuable time of their daily business to provide information to the CIES2014 Forms.

ab 12 on

Deep thanks are also given to enumerators, supervisors, and the staff of the NIS and the MOP who were devoted, hard working, and loyal. H.E. Ms. Hang Lina, Delegate of Royal Government of Cambodia in charge of Director General of the NIS ably led the CIES2014 operations, being assisted by Mr. Khin Sovorlak, Deputy Director General, and other NIS staff.

Finally, thanks are due to the members of the CIES Technical Committee and others that contributed to the great success of the CIES2014. *ok* *OK* *OK*

Outline of the 2014 Cambodia Inter-censal Economic Survey

1. Objective of the Survey

The survey aimed:

- a) to provide basic statistical data on establishments and enterprises for national and local policy planning three years after the 2011 Economic Census;
- b) to collect information on establishments and enterprises;
- c) to keep and improve the knowledge and skill required to conduct economic censuses and surveys;
- d) to keep and improve the knowledge and skill required to update and maintain the directory of establishments and enterprises as the sampling frame of various sample surveys on businesses.

2. Legal basis of the Survey

The survey was taken on the basis of Statistics Law, Article 8 and 9.

3. Date of the Survey

The survey was taken as of 1 March 2014.

The survey period was as follows:

- a) For establishments with 50 persons engaged or more, the enumeration was conducted within one month period from 1 to 31 March 2014;
- b) For establishments with less than 50 persons engaged, the confirmation of Enumeration Area map was conducted from 23 to 24 February 2014, the establishment listing was from 25 to 28 February 2014, and the enumeration was from 1 to 5 March 2014.

4. Area of the Survey

The survey covered all areas throughout the country.

5. Coverage of the Survey

The survey covered all establishments except the following establishments:

- a) Establishments classified into “Section A, Agriculture, forestry and fishing” specified in the United Nations International Standard Industrial Classification of Economic Activities, Revision 4 (hereinafter, quoted as the ISIC);
- b) Establishments classified into “Section O, Public administration and defense compulsory social security” specified in the ISIC;
- c) Establishments classified into “Section T, Activities of households as employers: undifferentiated goods- and services-producing activities of households for own use” specified in the ISIC;
- d) Establishments classified into “Section U, Activities of extraterritorial organizations and

bodies” specified in the ISIC;

e) Establishments operating the business on the street (Street Business).

6. Sampling Design

Around 10,000 establishments were selected as follows:

a) Large and medium scale establishments

All large and medium scale establishments with 50 persons engaged and more were surveyed. The number of large and medium scale establishments with 50 persons engaged and more was only 1,619 accounting for 0.32% of all the establishments in the country, while covering 508 thousand persons engaged (30.33%) according to the final results of the 2011 Economic Census.

b) Small and micro scale establishments

A stratified multistage sampling method was used for selecting small and micro scale establishments. The primary sampling units were Enumeration Areas (EAs) used in the 2011 Economic Census. Firstly, EAs were stratified into three strata according to industrial characteristics. Secondly, 30 EAs were selected from each of 6 largest provinces, and 20 EAs were selected from other 18 provinces. The number of sample EAs were allocated to the three strata proportionately to size in terms of number of EAs in each province. In total, 540 EAs accounting for about 3% of all the EAs in the country were selected. The secondary sampling units were establishments, and maximum 30 establishments were selected from each EA.

The coefficients of variation for numbers of establishments and persons engaged are shown in Appendix 5.

7. Enumeration unit

The establishment as an enumeration unit for the survey is defined according to UN definitions as follows:

The establishment can be defined as an economic unit that engages, under a single ownership or control - that is, under a single legal entity - in one, or predominantly one, kind of economic activity at a single physical location – for example, a mine, a factory or a shop.

However, street businesses are excluded from the enumeration in this survey.

8. Survey items

(1) Area information: Name and code of Province, District, Commune, Village, and EA

(2) Establishment information: Name of establishment, Address of establishment, Name of contact person, Telephone number of establishment, etc.

(3-1) Sex of representative

(3-2) Sex and Nationality of owner

(4-1) Registration at the Ministry of Commerce

- (4-2) Names of Ministries or Agencies regarding official license or approval
- (5) Ownership of establishment (Legal status)
- (6) Business hours
- (7) Year of starting the business
- (8) Tenure, Kind and Area (square meters) of business place
- (9) Number of persons engaged actually in this establishment one week before 1st March 2014
- (10) Kind of main business activities which this establishment only is engaged in
- (11) Single unit, Head or Branch office

<<Topics (12) to (14) below for Head offices only>>

- (12) Number of branch offices that this establishment supervises
- (13) Number of the entire regular employees at the end of December 2013
- (14) Kind of business activities of the entire entity

<<Topics (15) to (21) are asked to Single units and Head offices only>>

- (15) Does this establishment or this entity keep documents of Balance Sheet or Income Statement?

<<Topic (16) refers to all establishments of Single units or Head offices whose response to Topic 15 is “No” only>>

- (16-1) Total amount of revenues/sales per month or day in Riel or US dollar
- (16-2) Total amount of expenses per month or day in Riel or US dollar
- (16-2-1) Total amount of salaries and wages per month or day in Riel or US dollar
- (16-2-2) Total amount of electricity cost (purchased only)
- (16-3) Number of working days in February 2014

<<Topics (17) to (21) below refer only to establishments of Single units or Head offices whose response to Topic 15 is “Yes”>>

- (17) Total amount of assets at the end of December 2013
- (18) Equity held at the end of December 2013
- (19) Non-current liabilities at the end of December 2013
- (20) Current Liabilities at the end of December 2013
- (21) Amount of revenues and expenses during one year of Year 2013 under “Accrual basis accounting”, which records revenues and related expenses during the same period.

9. Organization

As a general rule, the survey was conducted through the following channels.

(a) Administrative Line

Director General of the National Institute of Statistics, Ministry of Planning ⇒ Directors of Provincial Departments of Planning (DPDP) ⇒ Chiefs of District Planning Offices → Chiefs of Communes ⇒ Village Chiefs

(b) Survey Line

Director General of the National Institute of Statistics, Ministry of Planning ⇒ Senior Commanding Officers (SCOs) ⇒ Regional Officers (ROs) and Assistant Regional Officers (AROs) ⇒ Supervisors ⇒ Enumerators.

SCOs managed all of the survey. One RO and ARO(s) were assigned to each province and managed all activities of the survey in the province where they were in charge.

(c) Provincial Coordinator

One Provincial Coordinator from provincial departments concerned is assigned to each province for the purpose of persuading refusal establishments as necessary.

10. Method of the Survey

There were two types of surveys: "survey of the establishments in the sampled EA by enumerator" and "survey of the establishments with 50 persons engaged or more by RO/ARO."

a) Survey of the establishments in the sampled EA by enumerator

Enumeration was carried out in such a manner that an enumerator who covered the enumeration area (EA) made a list of all establishments within the EA, selected 30 establishments if there were more than 30 establishments in the list, and interviewed the owner or representative of every of the (selected) establishments, and filled in the survey form.

b) Survey of the establishments with 50 persons engaged or more by RO/ARO

RO/ARO visited each establishment listed in the pre-printed large-size establishment list which was prepared based on the results of the 2011 Economic Census and other information provided by the provincial offices, etc., interviewed the owner or representative of the establishment, and filled in the survey form.

11. Mapping

Mapping was done only for sample EAs where there were boundary changes after March 2011, for sample EAs where there were 130 establishments or more in the 2011 Economic Census, and for newly developed areas such as SEZs.

Sample EA Boundary Maps are drawn on the basis of Village/EA Maps of the 2011 Economic Census by NIS Mapping Officers in order to instruct the enumeration areas to the enumerators.

12. Pretest

a) The pretest aimed to test Form-designing, enumeration methods, instructions in

enumerators' manual and so on, and to make an appropriate plan for the survey.
