An Establishment is an unit of economic activities operated with the objective of producing goods/services for sale or exchange with other goods and at least one person in charge or responsible in business risk.

Main activity is an economic activity which has the highest production value/ total sale/ total revenue among several economic activities in one establishment. If its production values/ total sales/ total revenues are the same, the criteria is the highest volume. If its production values/ total sales/revenues and volumes are the same, the criteria is the longest time for processing for products/ operational time. If its production values/ total sales/revenues, volume, and operation time are the same, the criteria of the main activity is an activity which mentioned by respondent.

Asset is an item or property owned by an establishment which has money value. It includes a tangible asset and an intangible asset.

Assets consist of :

- **Current assets**
- **Capital participation or investment in others**
- **Fixed assets**
- **Other current assets**

Current asset can be currencies, or others that can be changed with money, and stock of goods for sale or good will be used in one year. In detail, assets are cash money, bank account, saving, shares, inventories, delayed revenues, and other down payments.

Capital participation is a capital that invest in others

Fixed assets is not current assets, it can be many types of capital goods which owned by establishment such as machineries, transportation vehicles, offices stuffs. It is including intangible capital goods owned by establishment, such as patent, trade brand, copy right, etc. Fixed assets have the utility values for more than one year.

Other current assets, such as non productive land, building under construction, payment of borrowers delayed, and others which need to be solved relatively for long time.
