

統計表利用上の注意

1. 平均価格について

- (1) 月別又は旬別の平均価格は、単純算術平均（旬別調査品目の月平均価格は各旬別平均価格の単純算術平均）によるものである。
- (2) 年平均価格については、1月から12月までの月別価格を単純算術平均して算出した。年の途中において銘柄改正を行った場合は、改正後の銘柄で平均価格を算出した。
また、市町村銘柄を設定した場合は、より長期間調査した銘柄について年平均価格を算出した。ただし、異なる銘柄の調査月数が同数の場合は、年末に近い銘柄について年平均価格を算出した。
なお、銘柄改正を行っていない銘柄は、調査月数が所定の調査月数の半数未満となる場合、年平均価格は表章していない。
- (3) 各表の価格は、単純算術平均の結果を金額に応じて、銭未満、円未満、10円未満で四捨五入してある。
- (4) 価格は消費税込みの調査価格によるものである。

2. 記号について

- (1) ... 当該市町村で調査を行わないもの、又は調査期間の定めがあるため調査を行わないもの
- (2) - 調査銘柄の出回りがなかったか、又は調査した月数が所定の調査月数の半数未満のため年平均価格を算出できなかったもの

3. 品目・銘柄について

- (1) 第1表の「銘柄」欄が空白の品目については、特に銘柄を指定していない。
- (2) 掲載されている価格が市町村銘柄の価格である場合、当該価格の前にローマ字又は数字を付し、脚注に基本銘柄と異なる部分を注記した。
- (3) 年平均を銘柄改正前の価格を用いて算出した場合も、当該平均価格の前にローマ字又は数字を付し、脚注に銘柄改正前の銘柄を注記した。
- (4) 第4表には、全国的にみて地域及び店舗間の価格差の極めて小さい品目も含んでいる。

Notes on the Statistical Tables

1. Average price

- (1) Monthly average prices are simple arithmetic means of prices collected.
- (2) In principle, annual average prices for survey items are simple arithmetic means of monthly average prices of these items (a calendar year).

Annual average of a specification that the description was changed in the middle of the year was computed by using only the monthly prices after the change of the description, on the other hand, the prices before the change were not used for computation.

If a basic specification has no circulation in a city, this city can survey another specification that is similar to the basic specification in the city. Such a specification is called local specification. The monthly prices of local specification have notes on the left hand side. If the term of local specification was shorter than the term of basic specification, data for computation of annual average prices were limited to basic specification. And if the both terms were equal, data for computation were limited to the prices of later of the year.

And if survey terms of a specification were below specified terms, an annual average of it was not computed.

- (3) Prices in each table are shown by being rounded to sen(1/100 yen), yen or 10 yen, according to their amounts.
- (4) Prices include consumption tax.

2. Explanation of symbols

- (1) The mark “...” indicates either that the item is not surveyed in the city, town or village concerned or that it was not surveyed in the month concerned.
- (2) The mark “-” indicates either that the product to be surveyed was not available for any of its specifications or that the average price was not calculated, because the survey period for the product was shorter than half the specified duration.

3. Specification

- (1) In table 1, if a cell of “specification” of item is empty, the item has no specification.
- (2) If a reported price is a local specification, the point of contrast between a basic specification and a local specification is described in a footnote.
- (3) If an annual average price of an item is calculated from its prices that is not yet revised the specification, an alphabet or a letter is attached to left-hand of this average value, and the pre-revised specification is described in a footnote.
- (4) Table 4 also includes those items which have little price difference among stores or regions all over the country.
