The number of cases is counted, in principle, on the basis of acts committed by a person under suspicion. In the event that several cases were committed by one person or several cases were committed by several persons, they are inclusively counted as one case if they meet the prescribed conditions. As for the number of persons, in the case where the same person committed several crimes or several persons committed several crimes, they are counted as one person or several persons respectively for the severest statutory penalty (for the principal crime, in case the statutory penalties are the same). Attempted crimes and preparation of crimes are included in the corresponding crimes, except for the preparation of homicide. 1) For 2022, Forcible sexual intercourse.
