The results of the 2015 Population Census have been published in the reports consisting of seven volumes. Besides these reports, “Results of Preliminary Sample Tabulation”, “OVERVIEW OF POPULATION AND HOUSEHOLDS OF JAPAN” and “Population Map Series” have been published.

The Population Census of Japan has been conducted almost every five years since 1920, the 2015 Population Census being the twentieth. The statistics obtained through the Population Census provide the state of Japan’s population to be used for a variety of administrative and analytical purposes.

I hope that the results of the 2015 Population Census will be utilized as basic data in many fields of government policymaking including social welfare, employment, prevention of disasters etc.

On this occasion, I wish to express my deep appreciation to all of those who cooperated to the census-taking.
