

## Summary of the Results

### Migration throughout the Country

- Some 20 percent of the total population (persons usually live) move within five years.
- A close look at the total population (127,094,745) by place inhabited five years before (hereafter, “Place of usual residence five years ago”) indicates that those who live at the same place as five years before (hereafter, “Present address”) numbered 90,569,650 (78.1% of the total population).
- On the other hand, those who lived elsewhere than their present address (hereafter, “migrants”) numbered 25,323,189 (21.9%), of which those who had moved “The same shi, ku, machi or mura” numbered 11,425,427 (9.9%), those who had moved “Other ku of the same shi” numbered 1,612,589 (1.4%), those who had moved “Other shi, ku, machi or mura of the same prefecture” numbered 5,554,781 (4.8%), those who had moved “Other prefecture” numbered 6,213,230 (5.4%), and those who had moved “Outside Japan” numbered 517,162 (0.4%). Thus, 20 percent of the total population has changed address in the last five years.
- As compared with 2010, the percentages for population by place of usual residence five years ago remained almost the same.
- The number of migrants by sex numbered the following: for men, 12,457,406 (22.3%); and for women, 12,865,783 (21.4%).

**Population by Place of Usual Residence Five Years Ago — Japan (2010, 2015)**

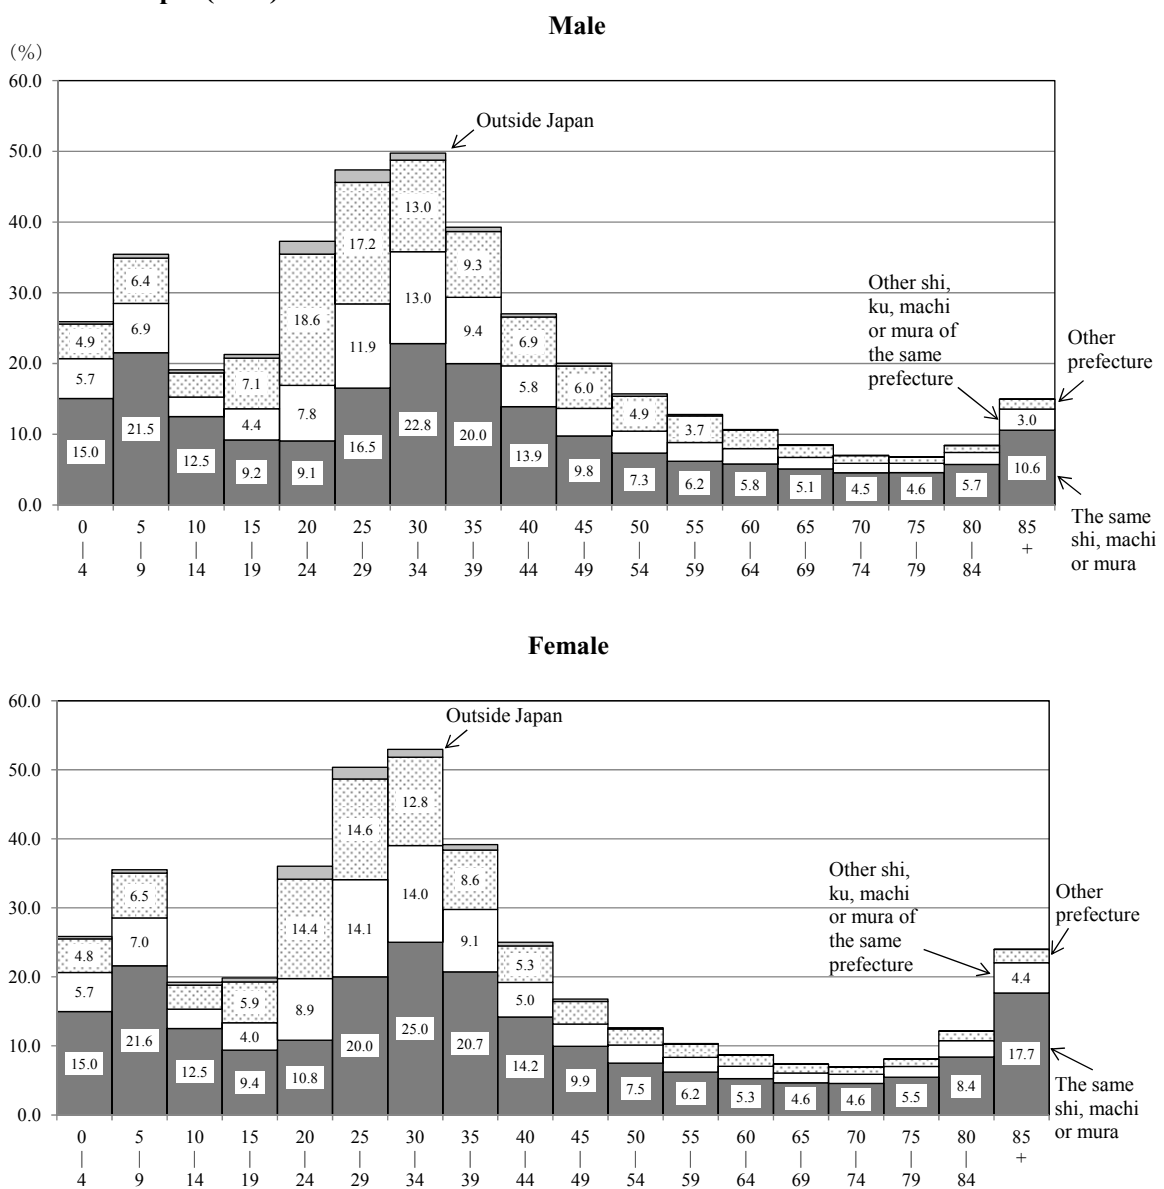

**Population by Place of Usual Residence Five Years Ago and Sex— Japan (2010, 2015)**

Year and sex	Persons usually live	Present address	Other than present residence (migrant)							Shi, ku, machi or mura of usual residence five years ago not reported	Migration status not reported	
				In Japan	The same shi, ku, machi or mura	Other ku of the same shi	Other shi, ku, machi or mura of the same prefecture	Other prefecture	Outside Japan

○ Rate of migration highest among those aged 30 to 34 at 51.3%

- The rate of migration to population by age (five-year groups) is 51.3% for those aged 30 to 34, the highest; followed by 25 to 29 (48.9%) and 35 to 39 (39.2%).
- As observed by sex, too, those aged 30 to 34 accounted for the highest percentages (49.7% for men, 53.0% for women), followed by 25 to 29 (47.4% for men, 50.4% for women) and 35 to 39 (39.3% for men, 39.2% for women).
- As observed by place of usual residence five years ago and sex, the rate of migration is as follows: for men, those aged 20 to 24 and 25 to 29 accounted for the highest percentages in the category “other prefecture,” while other age groups accounted for the highest percentage in the category “the same shi, machi or mura.” On the other hand, women aged 20 to 24 accounted for the highest percentage in the category “other prefecture,” while other age groups accounted for the highest percentage in the category “the same shi, machi or mura.”

**Rate of Migration by Place of Usual Residence Five Years Ago, Age Group (Five-Year Age Group) and Sex — Japan(2015)**

Note: “The same shi, machi or mura” collectively refers to “The same shi, ku, machi or mura” and “Other ku of the same shi.”
