

## Summary of the Results

### Notes

- 1 The figures in this report are obtained by rounding. In computing the various calculated values, such as percentages and ratios, figures less than the unit are used.
- 2 Ratios are calculated without "unknown" or calculated by the results with imputation.
- 3 For the results with imputation, see "Reference 3. The Calculation Method of the Imputed Values."
- \* For the detailed results, refer to the following website.  
<<https://www.stat.go.jp/english/data/kokusei/2020/summary.html>>

# 1. Basic Complete Tabulation on Population and Households

The population of Japan as of October 1, 2020, was 126,146 thousand.  
This was a consecutive decline from 2015.  
(0.7% decrease from 2015, 0.15% decrease on an annual basis)

- The population of Japan as of October 1, 2020, was 126,146 thousand, a decline of 949 thousand (0.7%) from 2015, or 0.15% on an annual basis.
- Broken down by sex, the male and female populations numbered 61,350 thousand and 64,797 thousand, respectively, and the sex ratio was 94.7. There were 3,447 thousand more females than males.

**Figure 1. Population and population change rate (1920 to 2020)**

**Table 1. Population by sex (1920 to 2020)**

Year	Population			Population Change over five-years		Change rate of annual basis (%)	Sex ratio
	Total	Male	Female	Number	Rate (%)		
1920	55,963,053	28,044,185	27,918,868	—	—	—	100.4
1925	59,736,822	30,013,109	29,723,713	3,773,769	6.7	1.31	101.0

1) Population adjusted by deducting the military and civilian personnel stationed outside Japan from the census population.

2) Based on the results of special census in 1945. Adjusted population obtained by adding the estimated military and civilian personnel and foreigners to the population by the Population Survey as of November 1 which excludes Okinawa-ken.

3) Excludes Okinawa-ken.

The population increased in 8 prefectures including Tokyo-to, Kanagawa-ken and Saitama-ken, while it decreased in 39 prefectures.

- Japan is divided into 47 prefectures. Looking at the population by prefecture in 2020, the population of Tokyo-to is the largest (14,048 thousand). The total population of the top 8 prefectures is 63,984 thousand, accounting for 50.7% of the total population of Japan.
- The population of the Tokyo Metropolitan Area including Tokyo-to, Kanagawa-ken, Saitama-ken and Chiba-ken is 36,914 thousand, accounting for approximately 30% (29.3%) of the total population of Japan.
- Among the 47 prefectures, the population increased in 8 prefectures (Tokyo-to marked the highest increase rate [3.9%], followed by Okinawa-ken [2.4%] and Kanagawa-ken [1.2%]), while it decreased in 39 prefectures. The decrease range has expanded in 33 prefectures.

### Figure 2. Population by prefecture (2020)

**Figure 3. Population change rate by prefecture (2010 to 2015, 2015 to 2020)**

Among 1,719 municipalities, the population decreased in 1,419 municipalities (82.5% of municipalities).

- The population decreased in 1,419 municipalities, which is more than 80% (82.5%) of all municipalities. Of those municipalities, more than half of the municipalities (51.3%) saw a decrease of 5% or more.
- The Tokyo-to Ku-area marked the highest number of increase (461 thousand), followed by Fukuoka-ken Fukuoka-shi (74 thousand) and Kanagawa-ken Kawasaki-shi (63 thousand).
- Fukuoka-ken Kitakyushu-shi marked the highest number of decrease (22 thousand), followed by Niigata-ken Niigata-shi (21 thousand) and Nagasaki-ken Nagasaki-shi (20 thousand).

**Table 2. Proportion of municipalities by population change rate (2005 to 2020)**

Population change rate	Municipalities					Proportion (%)

(Notice) Tokyo-to Ku-area is calculated as one Municipality.

1) Fukushima-ken Tomioka-machi, Fukushima-ken Okuma-machi and Fukushima-ken Namie-machi, which had zero population in 2015, are included only in the total number of population change rate and the total number of population increase. Also, Fukushima-ken Futaba-machi, which had a population of 0 in both 2015 and 2020, and Nagano-ken Oshika-mura, which had a population of 1,023 in both 2015 and 2020, are included only in the total number of population change rate.

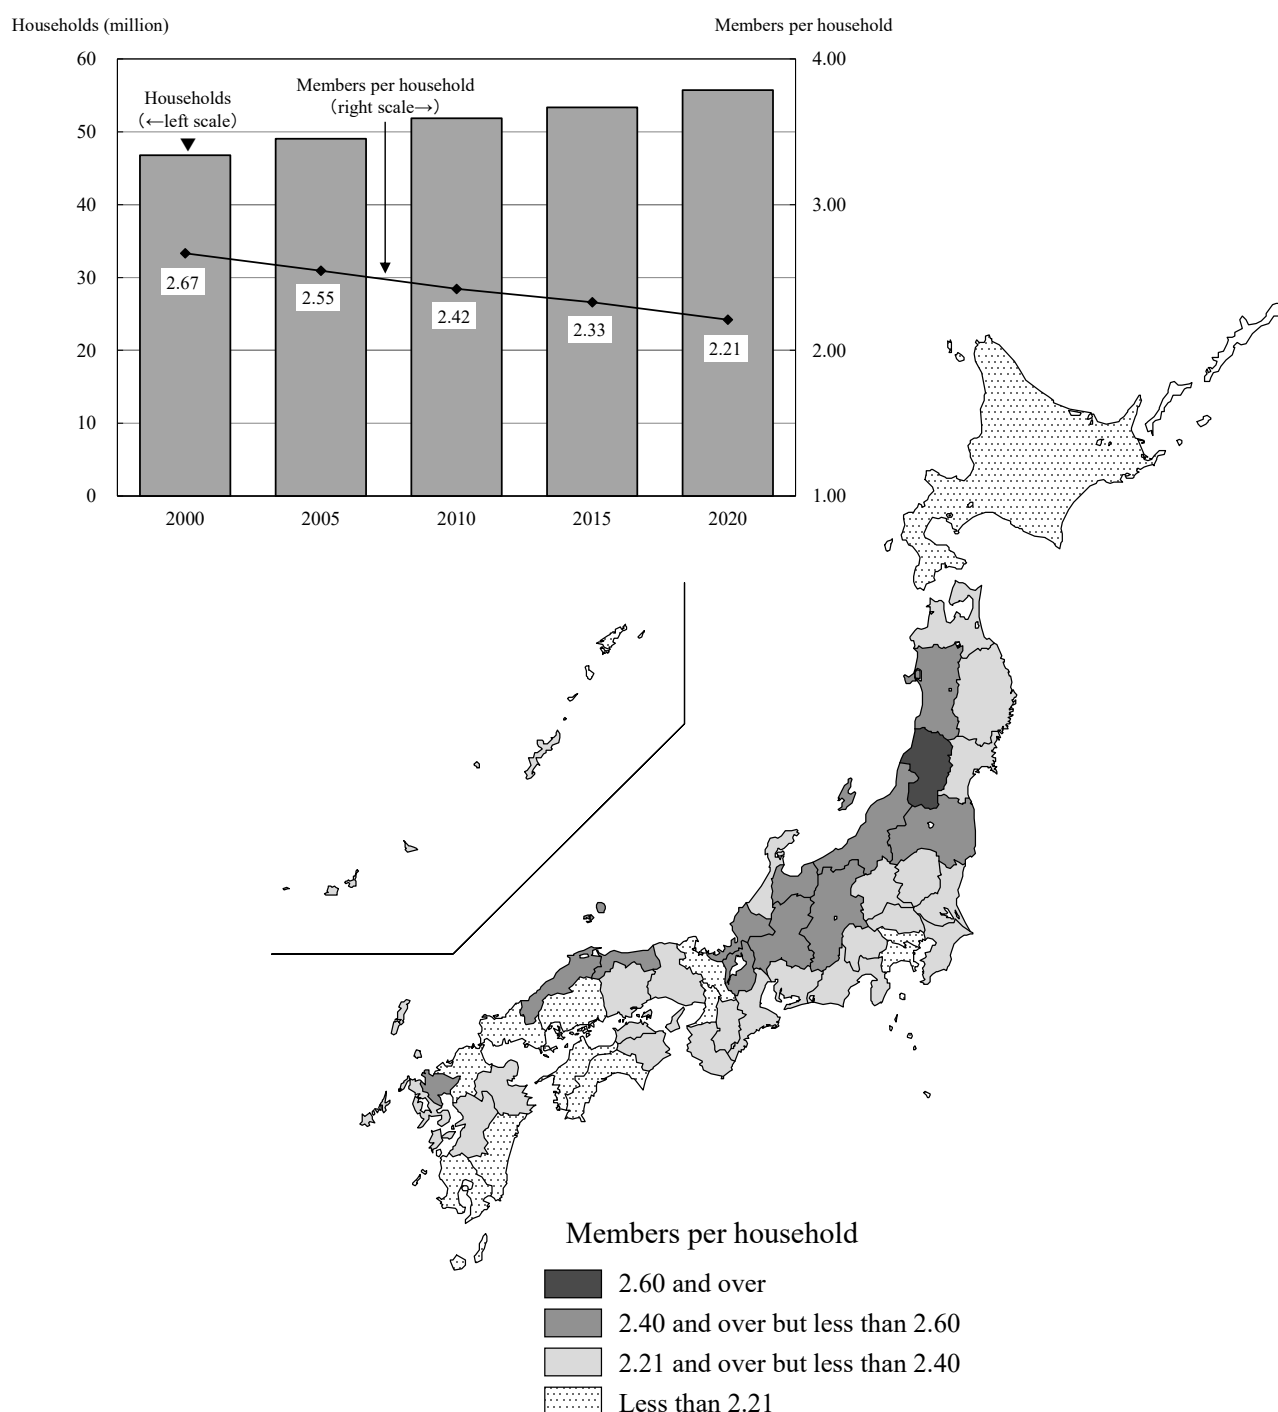

**Table 3. Population and population change by municipality (2015 to 2020)**

Ranking	Top 20 Municipalities of population increase		Population (2020)	Number of population increase (2015 to 2020)	Top 20 Municipalities of population decrease		Population (2020)	Number of population decrease (2015 to 2020)

The number of private households was 55,705 thousand.  
The number of members per private household was 2.21, which was a decline following 2015.

- The number of private households was 55,705 thousand as of October 1, 2020, an increase of 2,373 thousand from 2015.
- Private household members were 123,163 thousand. The members per private household stood at 2.21, consecutively declining from 2015.
- The members per private household by prefecture decreased in all 47 prefectures, with Yamagata-ken having the largest number of persons at 2.61 and Tokyo-to having the smallest number at 1.92.

**Figure 4. The number of private households and the members per private household (2000 to 2020), the members per private household by prefecture (2020)**

The percentage of the population aged 65 years old and over increased from 26.6% to 28.6%.

- The population under 15 years old was 15,032 thousand (11.9% of the total population), those aged 15 to 64 totaled 75,088 thousand (59.5%), and those aged 65 years old and over numbered 36,027 thousand (28.6%).

**Figure 5. Percentage of population composition by age group (among 3 groups) (1920 to 2020)**

(Notice) Figures for 2015 and 2020 are calculated based on the results with imputation, while figures before 2010 are calculated based on the original figures without "unknown."

The percentage of the population under 15 years old was the lowest level in the world, and that of the population aged 65 years old and over was the highest level in the world.

- The percentage of the population under 15 years old in Japan is 11.9%, which is the lowest in the world, followed by Korea (12.5%) and Italy (13.0%).
- The percentage of the population aged 65 years old and over in Japan is 28.6%, which is the highest in the world, followed by Italy (23.3%) and Germany (21.7%).

**Figure 6. Percentage of population under 15 years old and aged 65 years old and over (1950 to 2020)**

Source: United Nations, World Population Prospects, The 2019 Revision. For Japan, the figures are based on the Population Census of Japan.

(Notice) Figures for Japan for 2015 and 2020 are calculated based on the results with imputation, while figures of Japan before 2010 are calculated based on the original figures without "unknown."

The population of Japanese citizens was 123,399 thousand.  
(1.4% decrease from 2015, 0.29% decrease on an annual basis.)  
The population of foreign residents usually living in Japan was 2,747 thousand.  
(43.6% increase from 2015, 7.51% increase on an annual basis.)

- The population of Japanese citizens was 123,399 thousand (97.8% of the total population), a decline of 1,783 thousand (1.4%) from 2015, or 0.29% on an annual basis.
- The population of foreign residents usually living in Japan was 2,747 thousand (2.2% of the total population), an increase of 835 thousand (43.6%) from 2015, or 7.51% on an annual basis.

**Figure 7. The population and population change rate of Japanese citizens (1975 to 2020)**

(Notice) Population for 2015 and 2020 are based on the results with imputation.  
Population change rate in 2020 is calculated based on results with imputation, while population change rates before 2015 are calculated based on original figures.

**Figure 8. The population and population change rate of foreign residents (1975 to 2020)**

(Notice) Population for 2015 and 2020 are based on the results with imputation.  
Population change rate in 2020 is calculated based on results with imputation, while population change rates before 2015 are calculated based on original figures.

## 2. Basic Complete Tabulation on Labour Force

### Labour Force Status

The labour force participation rate rose to 72.4% for male and to 54.2% for female from 2015.

The labour force participation rate for female rose in all age groups.

**Figure 1. Labour force participation rate by age (five-year groups) and sex – Japan(1985, 2015, 2020)**

(Notice) The above figures for 2015 and 2020 are based on the results with imputation.

(Notice) The above figures for 2015 and 2020 are based on the results with imputation.

**Table. Labour force participation rate by age (five-year groups) and sex – Japan(1985, 2015, 2020)**

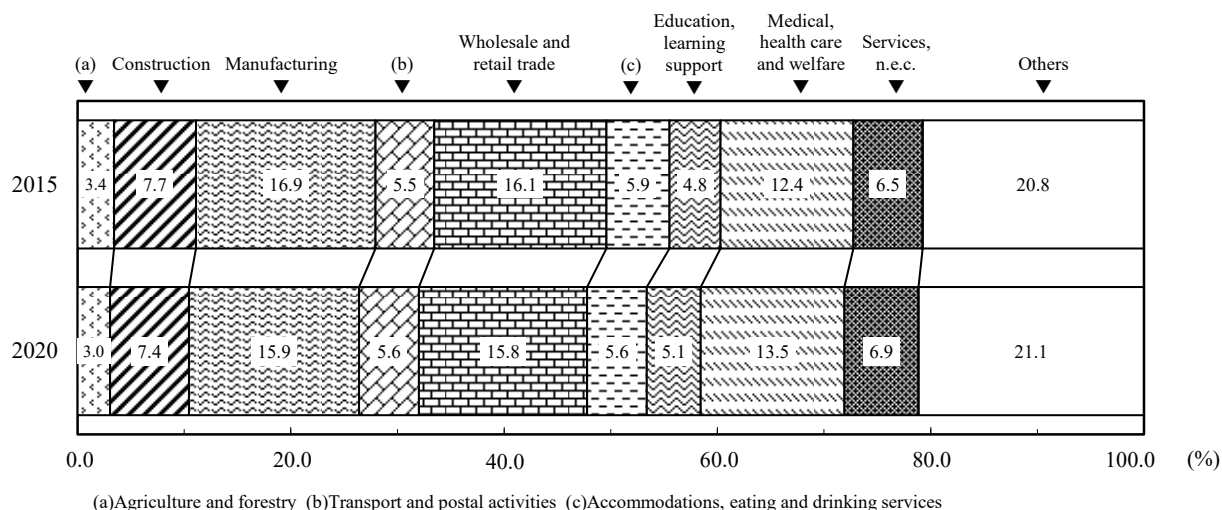

Sex, Year	Total	Age														
		15 to 19	20 to 24	25 to 29	30 to 34	35 to 39	40 to 44	45 to 49	50 to 54	55 to 59	60 to 64	65 to 69	70 to 74	75 to 79	80 to 84	85+
Male

2020	54.2	16.9	74.5	87.0	79.6	78.2	80.8	82.0	80.2	75.3	62.2	41.4	27.0	14.9	7.9	2.9

(Notice) The above figures for 2015 and 2020 are based on the results with imputation.

## Industry and Occupation

The percentage of those engaged in “medical, health care and welfare” rose the most, by 1.0 percentage points.

**Figure 2. Percentage of employed persons (aged 15 and over) by industry (major groups) – Japan (2015 to 2020)**

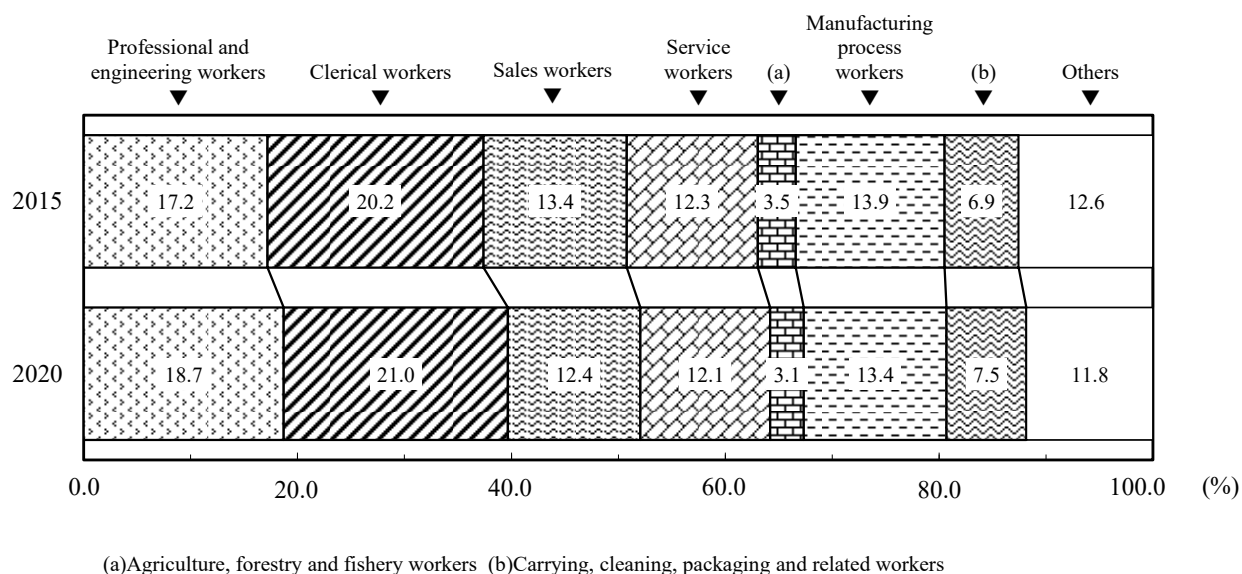

(Notice) The above figures are based on the results with imputation.

"Others" - "Fisheries", "Mining and quarrying of stone and gravel", "Electricity, gas, heat supply and water", "Information and communications", "Finance and insurance", "Real estate and goods rental and leasing", "Scientific research, professional and technical services", "Living-related and personal services and amusement services", "Compound services" and "Government, except elsewhere classified"

The percentage of “professional and engineering workers” rose the most, by 1.5 percentage points.

**Figure 3. Percentage of employed persons (aged 15 and over) by occupation (major groups) – Japan (2015 to 2020)**

(Notice) The above figures are based on the results with imputation.

"Others" - "Administrative and managerial workers", "Security workers", "Transport and machine operation workers" and "Construction and mining workers"

### 3. Tabulation on Place of Work or Schooling for Population and Labour Force

#### Population by Place of Work or School

The percentages of those going to work or school increased.

- Examining the percentages of those working or schooling to the total population, we find that “Working or schooling in the same Shi, Ku, Machi or Mura” accounted for 37.4%, “Working or schooling in other Shi, Ku, Machi or Mura” accounted for 26.2%, and those who “Neither working nor attending school” accounted for 36.4%.
- From 2015, “Working or schooling in the same Shi, Ku, Machi or Mura” increased by 0.5 percentage points, “Working or schooling in other Shi, Ku, Machi or Mura” increased by 0.7 percentage points, thus the percentages of those going to work or school increased. On the other hand, those who “Neither working nor attending school” decreased by 1.2 percentage points.

**Figure 1. Population by place of work or school – Japan (2015 to 2020)**

(Notice) The above figures are based on the results with imputation.

**Table 1. Population and employed persons by place of work or school – Japan (2015, 2020)**

Place of work or schooling	Number		Change Number 2015-2020	Proportion (%)		Differences (percentage point) 2015-2020
	2015	2020		2015	2020	
Total	127,094,745	126,146,099	-948,646	100.0	100.0	0.0
Neither working nor attending school 1)	47,812,586	45,971,683	-1,840,903	37.6	36.4	-1.2
Working or schooling in the same Shi, Ku, Machi or Mura	46,853,438	47,123,163	269,725	36.9	37.4	0.5
At home	6,420,597	6,577,533	156,936	5.1	5.2	0.2
Excluding working at home	40,432,841	40,545,630	112,789	31.8	32.1	0.3
Working or schooling in other Shi, Ku, Machi or Mura	32,428,721	33,051,253	622,532	25.5	26.2	0.7
Same prefecture	25,709,821	26,470,349	760,528	20.2	21.0	0.8
Other prefecture	6,718,900	6,580,904	-137,996	5.3	5.2	-0.1
Employed persons	63,409,191	64,995,224	1,586,033	100.0	100.0	0.0
Working or schooling in the same Shi, Ku, Machi or Mura	35,010,736	35,686,132	675,396	55.2	54.9	-0.3
At home	6,420,597	6,577,533	156,936	10.1	10.1	-0.0
Excluding working at home	28,590,139	29,108,599	518,460	45.1	44.8	-0.3
Working or schooling in other Shi, Ku, Machi or Mura	28,398,455	29,309,092	910,637	44.8	45.1	0.3
Same prefecture	22,575,091	23,493,685	918,594	35.6	36.1	0.5
Other prefecture	5,823,364	5,815,407	-7,957	9.2	8.9	-0.2

(Notice) The above figures are based on the results with imputation.

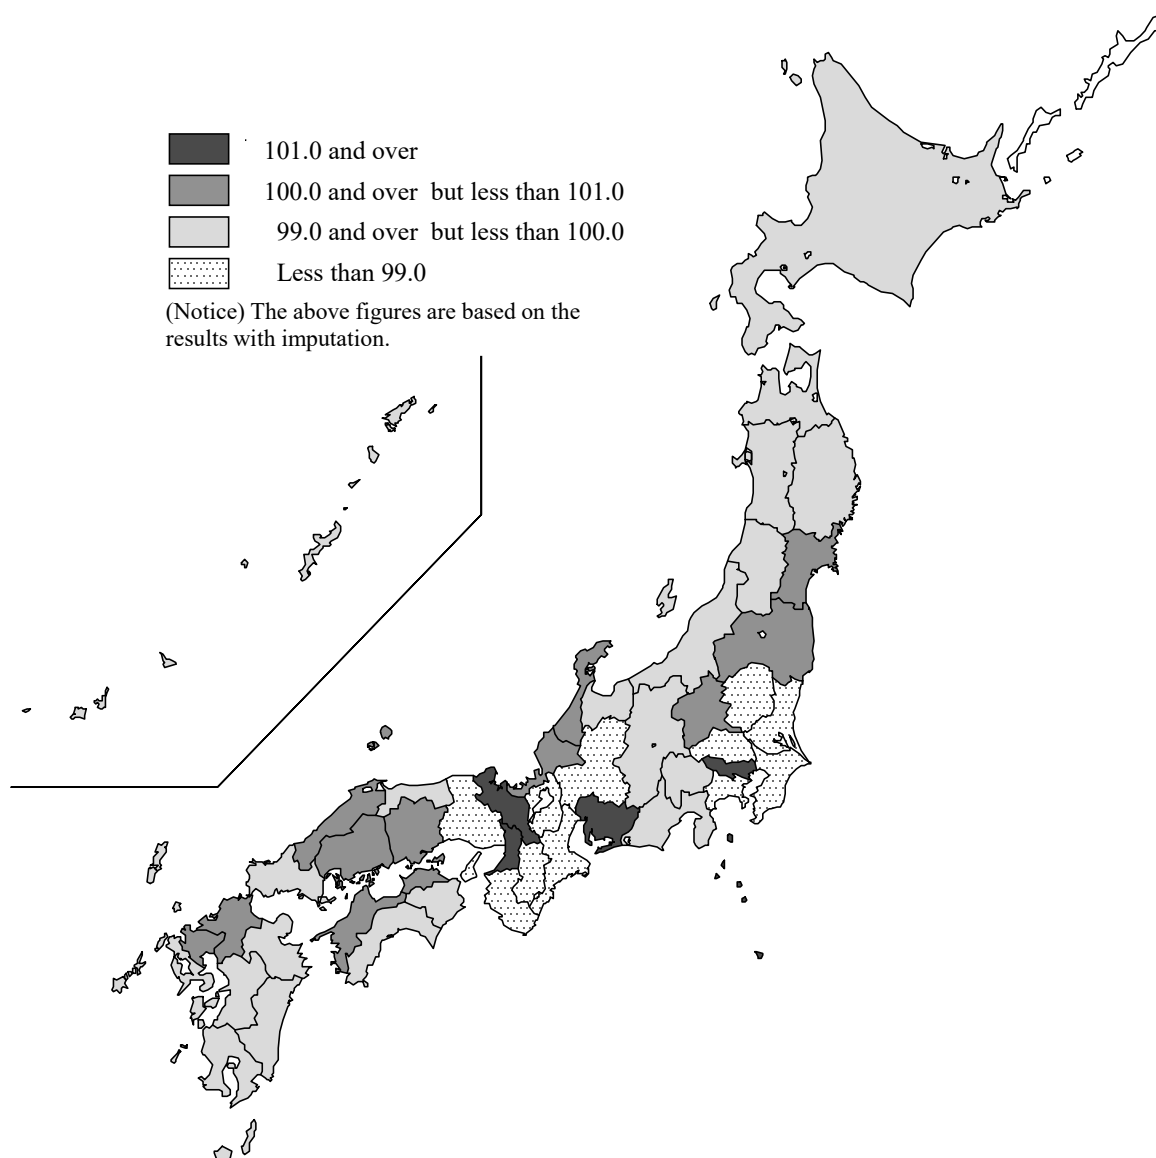

1) Labour force status: “Unemployed,” “Did housework,” and “Others”.

## Ratio of Daytime Population to Nighttime Population by Prefecture

The ratio of daytime population to nighttime population was highest in Tokyo-to (119.2) and lowest in Saitama-ken (87.6).

- Daytime population by prefecture was as follows: Tokyo-to had the most people (16,752 thousand), followed by Osaka-fu (9,228 thousand) and Kanagawa-ken (8,306 thousand) .
- The ratio of daytime population to nighttime population by prefecture were as follows: Tokyo-to had 119.2, the highest, followed by Osaka-fu (104.4) and Kyoto-fu (102.0). In 16 prefectures, there were more people during the day than during the night. On the other hand, Saitama-ken had 87.6, the lowest, followed by Chiba-ken (88.3), and Kanagawa-ken (89.9).
- From 2015, Nara-ken increased the most, by 0.5 percentage points, Tokyo-to decreased the most, by 0.9 percentage points.

**Figure 2. Ratio of daytime population to nighttime population – prefecture (2020)**

## 4. Tabulation on Internal Migration for Population

### Migration throughout the Country

Some 20 percent of the total population (persons usually live) move within five years.

- A close look at the persons usually live (126,146 thousand) by place of residence five years before (hereinafter, “place of usual residence five years ago”) indicates that those who live at the same place (hereinafter, “present address”) as five years before numbered 97,474 thousand (77.3% of the persons usually live).
- On the other hand, those who lived elsewhere than their present address and “migrated” (hereinafter, “Migrants”) numbered 28,672 thousand (22.7%), of which those who had moved “From the same Shi, Machi or Mura” numbered 13,707 thousand (10.9%), those who had moved “From other Shi, Machi or Mura of the same prefecture” numbered 6,140 thousand (4.9%), those who had moved “From other prefecture” numbered 7,789 thousand (6.2%), and those who had moved “From outside Japan” numbered 1,035 thousand (0.8%). Thus, 20 percent of the persons usually live have changed address in the last five years.
- As compared with 2015, “From outside Japan” increased by 377 thousand (increase by 57.3% from 2015, increasing by 0.3 points). On the other hand, “From the same Shi, Machi or Mura” decreased by 1,193 thousand (decrease by 8.0% from 2015, decreasing by 0.9 points).
- The number of migrants by sex numbered the following: for male, 14,433 thousand (23.5% of persons usually live); and for female, 14,239 thousand (22.0%).

**Figure 1. Population by place of usual residence five years ago  
– Japan (2015, 2020)**

(Notice) The above figures are based on the results with imputation.

## Rate of migration highest among those aged 25 to 29 at 56.6%

- The rate of migration to population by age (five-year groups) is 56.6% for those aged 25 to 29, the highest; followed by 30 to 34 (53.8%) and 20 to 24 (44.1%).
- As observed by sex, too, those aged 25 to 29 accounted for the highest percentages (56.3% for male, 57.0% for female), followed by 30 to 34 (52.9% for male, 54.7% for female) and 20 to 24 (44.5% for male, 43.6% for female).
- The breakdown of the rate of migration by sex and age (five-year groups) shows that for both male and female, those aged 20 to 24 and 25 to 29 accounted for the highest percentages in the category “From other prefecture,” while other age groups accounted for the highest percentage in the category “From the same Shi, Machi or Mura.”
