7 Business Activities

This chapter contains statistics on business operation, such as the characteristics of business organisations and industrial categories, employees, conditions of assets, liabilities and capital, profit and loss, bankruptcy, etc., of incorporated and unincorporated enterprises.

For the number of farm, forestry and fishery households, see "8 Agriculture, Forestry and Fisheries", for the clearance of bills, the registration of dishonored bills, and the number of dishonored bill reports, etc. at electronic clearings, see "16 Finance and Insurance" and for business registrations, see "28 Justice and Police".

Economic Census (Fundamental Statistical Survey) The Economic Census is conducted to grasp the economic activity of establishments and enterprises, to clarify the overall industrial structure of Japan, and to provide a basic statistical framework for other sample surveys on establishments or enterprises. The Economic Census consists of Economic Census for Business Frame, which clarifies the basic structure of establishments and enterprises, and Economic Census for Business Activity, which clarifies the situation of the economic activity of establishments and enterprises. This chapter covers the results of the Economic Census for Business Activity.

Economic Census for Business Activity The Economic Census for Business Activity is conducted by the Statistics Bureau, Ministry of Internal Affairs and Communications, or by the Ministry of Economy, Trade and Industry. The objectives are to identify the structure of business establishments and enterprises in all industries on a national and regional level by comprehensively investigating accounting items such as amounts of sales (income) and expenses in all industrial fields at the same time and to obtain basic information for conducting various statistical surveys. The survey was established in 2012 and has been conducted every five years since 2016.

Up to the 2016 survey, all business establishments and enterprises except those belonging to the agriculture, forestry and fisheries industry and managed by individuals, those belonging to the domestic service industry, those belonging to foreign public service, and those belonging to the national and local governments were surveyed. However, the 2021 survey targeted all business establishments and enterprises except those belonging to the agriculture, forestry and fisheries industry and managed by individuals, those belonging to the domestic service industry, and those belonging to foreign public service and consisted of two surveys: a survey of business establishments other than those belonging to the national and local governments (Questionnaire A) and a survey of business establishments of the national and local governments (Questionnaire B).

Annual Business Survey (Fundamental Statistical Survey) This survey is conducted annually by the Statistics Bureau, Ministry of Internal Affairs and Communications and the Ministry of Economy, Trade and Industry, with the exception of the year in which the Economic Census for Business Activity is conducted. The purpose of the survey is to identify the structure of all industries, such as their added value, and contribute to improving the precision of the National Accounts Statistics, and to grasp the actual situation in the interim year of the Economic Census for Business Activity implemented every five years.

The survey has been conducted since 2019, integrating and reorganising three surveys: the Survey on Service Industries (expanded survey) (Ministry of Internal Affairs and Communications), the Census of Commerce (Ministry of Economy, Trade and Industry), and the Survey on Selected Service Industries (Ministry of Economy, Trade and Industry). Starting with the 2022 survey, corporate establishments above a certain size in all industries (tabulation across industries) are

covered, and the previously conducted Census of Manufacture (Ministry of Internal Affairs and Communications and Ministry of Economy, Trade and Industry) is now conducted as part of the Annual Business Survey (Survey of Manufacturing Industry). The survey also covers corporate establishments in the manufacturing industry above a certain size. This chapter covers the results of the tabulation across industries.

The population for the tabulation across industries is the establishments frame database. The surveyed enterprises are corporate enterprises of a certain size or larger belonging to all industries except for individual enterprises belonging to A - Agriculture and Forestry; individual enterprises belonging to B - Fisheries; enterprises belonging to 792 - Domestic services under N - Living-related and Personal Services and Amusement Services; enterprises belonging to 93 - Political, business and cultural organisations, 94 - Religion, or 96 - Foreign governments and international agencies in Japan under R - Services, N.E.C.; and enterprises belonging to S - Government, except elsewhere classified, in the Japan Standard Industrial Classification (JSIC).

Of these, excluding enterprises managed by individuals, enterprises within the range of achieving 80% of the total sales amount pertaining to the major, middle, and minor categories of the JSIC by accumulating sales from top to bottom per category are surveyed.

Financial Statements Statistics of Corporations by Industry (Fundamental Statistical Survey) This survey has been conducted every year since 1948 by the Ministry of Finance with the purpose of clarifying the business activities of profit-making corporations and of preparing a list of corporations as the basis for various statistical surveys of corporations.

This survey is composed of an annual survey and quarterly survey. The annual survey collects data on the basis of the final closing accounts of the fiscal year from all profit-making corporations. On the other hand, the quarterly survey collects data on the basis of provisional closing accounts of the quarter from profit-making corporations with capital, investment or funds of 10 million *yen* or over. From fiscal 2008, the finance and insurance industry is also covered.

All the corporations with capital of 500 million *yen* or more (for finance and insurance, 100 million *yen* or more) are surveyed, while corporations with capital of less than 500 million *yen* (for finance and insurance, less than 100 million *yen*) are selected by the random sampling method (equal probability systematic sampling). The annual survey is carried out in the first half of the fiscal year (from April to September) and the second half of the fiscal year (from October to next March), where final closing accounts which were settled during each half year are reported. However, for corporations having biannual closing accounts, their data on assets, liabilities and net assets are obtained from the closing accounts for the second half year, and data on profit and loss are obtained as the sum of the closing accounts for the first and second half year.

Business Outlook Survey This survey has been conducted jointly by the Cabinet Office and the Ministry of Finance quarterly with the purpose of obtaining basic information on the present situation and outlook of the economy by analysing the business activities of enterprises which play a major part of the national economy.

The scope of this survey is limited to corporations with stated capital, capital contributions, or funds of 10 million *yen* or more (electricity, gas, water supply, finance, and insurance businesses with stated capital of 100 million *yen* or more). The survey is conducted quarterly on approximately 14,400 corporations randomly selected by industry and scale of stated capital from the Financial Statements Statistics of Corporations by Industry (all corporations in the case of corporations with stated capital of 3 billion *yen* or more).

Unincorporated Enterprise Survey (Fundamental Statistical Survey) The survey covers items relating to the proprietors and employees of unincorporated enterprises and the business conditions at those enterprises, such as operating income and expenditure, etc., as of 1 June every year. It is conducted by the Statistics Bureau, Ministry of Internal Affairs and Communications, with the purpose of obtaining basic data for various administrative measures.

The results of the survey are used as basic data for the promotion of small and medium-sized enterprises by national and local governments and as analysis data for various projects and measures. They are also used to estimate the national accounts (GDP statistics).

Starting with the 2019 survey, a drastic review of the survey was conducted in order to further promote the utilisation of the results. The industries covered by the survey were expanded from four industries (manufacturing, wholesale and retail trade, accommodations and food service/restaurants, and services) to almost all industries. The number of unincorporated enterprises covered by the survey has also been expanded from about 4,000 to about 40,000. Accompanying the expansion of the scope of the survey, the survey period was consolidated from the previous quarterly survey (trends) and annual survey (structure) to an annual survey only. In addition, results by prefecture are now released.

Enterprise Bankruptcy Record *Teikoku* Databank, Ltd. has compiled and published the Enterprise Bankruptcy Record. The data covers companies and private businesses with liabilities of 10 million *yen* or more that have filed for legal liquidation under the four bankruptcy laws (Corporate Reorganisation Act, Civil Rehabilitation Act, Bankruptcy Act, and Special Settlement). Voluntary liquidation (suspension of bank transactions, internal liquidation, etc.) is not included in the calculation.

Ministry of Economy, Trade and Industry Basic Survey of Japanese Business Structure and Activities (Fundamental Statistical Survey) The survey has been conducted every year by the Ministry of Economy, Trade and Industry with the purpose of obtaining basic business information needed for the government to formulate policies and programmes related to Japanese business enterprises.

The survey covers all companies with 50 or more employees and capital or investment of 30 million *yen* or more, which have establishments that fall under the following categories of the Japan Standard Industrial Classification: Major group C-Mining and Quarrying of stone and Gravel; E-Manufacturing; F-Electricity, Gas, Heat supply and Water (excluding medium group 35-Heat supply and 36-Collection, Purification and Distribution of Water, and Sewage Collection, Processing and Disposal); the part of G-Information and Communications shown in the appended table ; I-Wholesale and Retail Trade; the part of J-Finance and Insurance shown in the table; the part of K-Real Estate and Goods Rental and Leasing shown in the table; the part of L-Scientific Research, Professional and Technical Services shown in the table; the part of M-Accommodations, Eating and Drinking Services shown in the table; the part of N-Living-related and Personal Services and Amusement Services shown in the table; the part of O-Education, Learning Support shown in the table; and the part of R-Services, n.e.c. (not elsewhere classified) in the table. Since the 2022 survey, it has been unified with the same lists and dates as the Annual Business Survey and the Survey of Research and Development.

G-Information and Communications	Minor Group 391-Computer programming and other software services, 392-Data processing and information services, Medium Group 40-Internet based services, Detailed Group 4111-Motion picture and video production, except television program and animation production, 4112-Television program production, except animation production, 4113-Animation production, Minor Group 413-Newspaper publishers, 414-Publishers, except newspapers
J-Finance and Insurance	Minor Group 643-Credit card and installment finance businesses
K-Real Estate and Goods Rental and Leasing	Medium Group 70-Goods rental and leasing (Minor Group 704-Automobile rental, Detailed Group 7092-Audio and visual recordings rental, (except otherwise classified), 7099-Goods rental and leasing, n.e.c, excluding rental)
L-Scientific Research, Professional and Technical Services	Medium Group 71-Scientific and development research institutes, Minor Group 726-Design services, Medium Group 73-Advertising, Minor Group 743-Mechanical design services, 744-Commodity inspection and non-destructive testing services, 745-Surveyor certification, 746-Photographic studios, and 749-Miscellaneous technical services
M-Accommodations, Eating and Drinking Services	Medium Group 76-Eating and drinking places (excluding Detailed Group 7622-*Ryotei* (special Japanese restaurants), Minor Group 765-Drinking houses and beer halls, 766-Bars, cabarets and night clubs), 77-Food take-out and delivery services
N-Living-related and Personal Services and Amusement Services	Medium Group 78-Laundry, beauty and bath services (excluding Minor Group 785-Miscellaneous public bathhouses), 79-Miscellaneous living-related and personal services (excluding Minor Group 791-Travel agencies, Detailed Group 7999-Miscellaneous living-related and personal services, n.e.c.), Minor Group 801-Cinemas, 804-Sports facilities (excluding Detailed Group 8041-Sports facilities, except otherwise classified), 805-Public gardens and amusement parks
O-Education, Learning Support	Detailed Group 8245-Foreign language instructions, 8249-Miscellaneous instruction services for arts, culture and technical skills (only general culture classes)
R-Services, n.e.c.	Medium Group 88-Waste disposal business, 90-Machine, etc. repair services, except otherwise classified, 91-Employment and worker dispatching services, 92-Miscellaneous business services (excluding Minor Group 922-Building operation and maintenance services, 923-Guard services, Detailed Group 9295-Pest control services)

See the Glossary for Terms in this chapter.
