13 Transport and Tourism

This chapter covers transport and tourism.

The section on transport contains statistics on the traffic volume by type of transport and facilities related to transportation.

The section on tourism contains the number of foreign visitors to Japan and statistics about travel.

For tourism, also see "26 Culture".

Survey of Current Road Infrastructure Conditions This survey is a statistical survey on roads (national expressways, general national highways, prefectural roads, and municipal roads under the Road Act) and is conducted annually by the Ministry of Land, Infrastructure and Transport (MLIT) for the purpose of obtaining basic data to contribute to road administration, such as planning and formulating road development plans, etc. in response to social conditions and managing road facilities. The survey is conducted as of 31 March (1 April before 2018). The survey consists of a survey on the current status of road facilities, which investigates the present conditions of roads, bridges, and tunnels, and a survey on road project costs.

Survey on Motor Vehicle Transport (Fundamental Statistical Survey) This survey, covering motor vehicles engaged in transport activity in Japan, is conducted by the Ministry of Land, Infrastructure, Transport and Tourism to clarify the conditions of motor vehicle transport by determining the traffic volume, running distance, etc., and to provide basic data for policies on economics, traffic, etc. The survey covers motor vehicles selected by the Minister of Land, Infrastructure, Transport and Tourism among ordinary motor vehicles, small motor vehicles and light motor vehicles, and excludes light motor vehicles and passenger cars for private use, and motor vehicles not applied to general transport among trucks for private use. The survey method and tabulation method have been changed since the fiscal 2020 survey. The results of the survey are released as preliminary reports, monthly reports, and annual reports.

Survey on Railway Transport This survey is conducted by the Ministry of Land, Infrastructure, Transport and Tourism to clarify the conditions of transport by railway, tram and cableway, and to provide basic data for policies on economics, traffic, etc. This survey consists of investigation into the actual conditions of railway and tramway passenger transportation, the actual conditions of railway cargo transportation, railway and tramway running kilometres, and the actual conditions of cableway passenger transportation. The survey covers railway and tramway companies that have been licensed or granted a patent based on the Railway Business Act and the Tramways Act, as well as cableway companies (excluding cargo) that have been licensed based on the Railway Business Act. The results of the survey are released as preliminary reports, fixed reports, and annual reports.

Survey on Coastwise Vessel Transport (Fundamental Statistical Survey) This survey is conducted by the Ministry of Land, Infrastructure, Transport and Tourism to clarify the conditions of freight transport by vessel engaged in coastal shipping and to provide basic data for policies on economics, traffic, etc. These statistics are derived from the Survey on Coastwise Vessel Transport, which covers carriers that transport cargo using vessels with a total tonnage of at least twenty tons among carriers engaged in coastal transportation business as stipulated in the Coastal Shipping Business Act, and the Survey on Transportation by Vessels for Private Use, which covers vessels with a total tonnage of at least one hundred tons or at least thirty metres among carriers that transport cargo using private vessels as stipulated in the Coastal

Shipping Business Act. The results of the survey are released as preliminary reports, fixed reports, and annual reports.

Survey on Air Transport This survey is conducted by the Ministry of Land, Infrastructure, Transport and Tourism to clarify the conditions of air transport business and airplane-using business, and to provide basic data for policies on economics, traffic, etc. It consists of the Survey on Operating Hours of Aircraft, the Survey on Air Transport by Domestic Lines, and the Survey on Air Transport by International Lines. The survey covers the air transport companies and airplane-using companies authorised under the provisions of the Civil Aeronautics Act. The results of the survey are released as preliminary reports (monthly and yearly) and annual reports.

MLIT Maritime Bureau Annual Report in Figures Every year, the Ministry of Land, Infrastructure, Transport and Tourism releases the "MLIT Maritime Bureau Annual Report" on the situation surrounding maritime affairs and the activities of the Maritime Bureau. Starting with the 2020 edition, the composition was changed, and the "MLIT Maritime Bureau Annual Report" and "MLIT Maritime Bureau Annual Report in figures" are now published separately. This chapter covers figures for passenger transport from "MLIT Maritime Bureau Annual Report in figures."

Statistics on Motor Vehicles Owned This statistics is a tabulation of the number of motor vehicles owned at the end of each month by use, vehicle type, and business type via the motor vehicle registration and inspection electronic data processing system, etc. of the Ministry of Land, Infrastructure, Transport and Tourism.

New Car Statistical Data The Japan Automobile Dealers Association publishes monthly and annual reports of New Car Statistical Data broken down by vehicle type, brand, fuel type, etc. This chapter covers the number of registered vehicles by vehicle type. The numbers in the statistical data are the number of vehicles at the time of registration with the local transport bureau and are classified based on the registered vehicle number.

Annual Report on Railway Statistics This report is published annually by the Ministry of Land, Infrastructure, Transport and Tourism. It consists of statistics on railway, tramway, and cableway companies throughout Japan and is based on the results of reports on railway and tramway operations, business reports, and the annual report on railway transportation statistics. This chapter covers revenue from passenger transport and freight revenue.

Shipping Statistics Handbook This handbook is published annually by the Japanese Shipowners' Association, a general incorporated association. It contains various domestic and overseas statistics related to quantitative analysis of the size of merchant vessels in the world and in Japan, the construction of ships, the amount of maritime movement of major cargo, and trends in ports and harbors, mariners, and major related industries.

Number of Visitor Arrivals The Number of Visitor Arrivals is published each month by the Japan National Tourism Organisation (JNTO). The number of foreign visitors to Japan is compiled by the JNTO on the basis of the Immigration Control Statistics from the Ministry of Justice. In addition to the total number of foreign visitors to Japan, figures for the number of foreign visitors to Japan by purpose such as tourism and commerce are also disclosed.

Travel Transaction Status of Major Travel Agencies The Japan Tourism Agency publishes the transaction amounts of major travel agencies in monthly bulletins. The transaction amounts are preliminary figures and may differ

from the figures in the financial statements of each company.

Overnight Travel Statistics Survey This survey is conducted by the Japan Tourism Agency on accommodation facilities in order to clarify the conditions of overnight travel in Japan and to obtain basic data for policy on tourism. The survey covers hotels, Japanese-style hotels (*ryokan*), budget hotels, and the lodgings of companies, organisations, etc. across the country and releases estimates of the total number of people staying at the 20,000 facilities sampled.

Travel and Tourism Consumption Trend Survey This survey is conducted quarterly by the Japan Tourism Agency in order to clarify the conditions of travel in Japan. The survey covered approximately 26,000 people who were residents of Japan and were randomly selected based on the Basic Resident Registration.

See the Glossary for Terms in this chapter.
