23 Social Security

This chapter covers social security expenditure, social insurance, and social welfare.

The section on social security expenditure contains statistics on social expenditure, social security benefits and finances.

The section on social insurance contains statistics on medical care insurance, pension insurance, employment insurance, long-term care insurance and industrial accident compensation insurance.

The section on social welfare contains statistics on social welfare administration services, old age health and medical welfare, general welfare services, livelihood aid and social welfare institutions.

For public health and medical care, see "24 Health and Sanitation", and for industrial injuries, see "29 Disasters and Accidents".

Financial Statistics of Social Security (Fundamental Statistics) The National Institute of Population and Social Security Research compiles and publishes the Financial Statistics of Social Security in Japan every year. The statistics are intended to clarify the scale of social security as a whole, as well as the composition of social security by policy area in Japan, and to serve as fundamental resources to monitor social security policies and finance. The statistics include annual expenditure on social security schemes such as pensions, health insurance, nursing care insurance, employment insurance, and public assistance.

Financial Statistics of Social Security are statistics compiled in accordance with standards established by international organisations. Financial Statistics of Social Security is a generic term covering social expenditure based on the standards of the Organisation for Economic Co-operation and Development (OECD), social security benefits and social security revenue based on the standards of the International Labour Organisation (ILO), social security revenue based on the standards of the European Union (EU). This chapter covers social expenditure based on the standards of the OECD and social security benefits and social security revenue based on the standards of the ILO.

Social expenditure based on OECD standards covers public and private provision of financial support and benefits to individuals and households to compensate for an extreme decline in welfare levels. The scope of aggregation, however, defines only institutional expenditure as social expenditure and does not include direct purchases of goods and services by people or individual contracts and transfers. The determination of whether or not a system falls under the category of "social expenditure" first depends on whether the benefit has one or more social objectives and the system contributes to the redistribution of income among individuals, or whether participation in the system is officially enforced.

Social objectives related to social expenditure are divided into nine policy areas:

(1) Old age (2) Bereaved family (3) Disability, employment injury, or disease (4) Health (5) Family

(6) Active labour market policies (7) Unemployment (8) Housing (9) Other policy areas

Compared to "social security benefit expenses", there is a difference in scope. Some expenses not transferred directly to the individual, such as facility maintenance expenses, are included. It is an important indicator from the perspective of comparing social security costs with other countries.

Social security benefits under ILO standards are based on a social security system that is defined as meeting the following three conditions.

(1) The system is to provide benefits against the following risks and / or needs:

Old age, Bereaved family, Disability, Industrial accident, Hygiene and medical care, Family, Unemployment, Residence and Livelihood protection, etc.

(2) The system must be established by a law to provide specific benefits, and require public, semi-public or independent organisations to assume responsibility for it.
(3) It must be managed by a public, semi-public or an independent organ established by a law. Otherwise, it must be private organs entrusted by a law to execute their duties.

Social security revenue is allocated for social security benefit costs (ILO standards), administrative costs, facility maintenance costs, etc. There are four major categories: social insurance, public expenses, asset income and others.

National Medical Care Expenditure National Medical Care Expenditure is published every year by the Ministry of Health, Labour and Welfare as the estimate of total of all expenses associated with medical treatment of diseases and injuries that is eligible to be covered by health insurance at medical institutions, etc. during the relevant fiscal year as basic data for ensuring medical care necessary for the people. The amount includes expenditure for medical and dental examinations and treatments, dispensing in pharmacies, inpatient meal service, living support, home-visit nursing medical care, etc.

Basic Information Concerning Medical Insurance The Basic Information Concerning Medical Insurance is published every year by the Ministry of Health, Labour and Welfare. The information includes the application, income and expenditure and medical expenses of each medical insurance system based on its business status reports and surveys.

Business Annual Report This report is published every year by the Japan Health Insurance Association based on the results of the operations of each branch and the settlement of accounts for each fiscal year. The report provides an overview of the state of the medical insurance system, focusing on the Japan Health Insurance Association.

Report on Health Insurance and Seaman's Insurance This report is published every month and every year by the Ministry of Health, Labour and Welfare to grasp the business conditions of health insurance and seaman's insurance and to obtain basic information for the sound management of the health insurance system and seaman's insurance system.

Annual Business Statistics Report on Mutual Aid Association of National Public Employees This report contains records of the national public employee mutual aid association program compiled by the Ministry of Finance and the Federation of National Public Service Personnel Mutual Aid Associations and a summary of related accounting. The annual report includes a brief statistical overview and is published annually by the Ministry of Finance.

Annual Business Report on Mutual Aid Associations of Local Public Employees This report is compiled based on business reports and financial statements submitted by mutual aid associations for local public employees and mutual aid associations for local assembly members and is published annually by the Ministry of Internal Affairs and Communications. The purpose of the report is to summarize the implementation status of mutual aid associations for local public employees, the current status of their accounting, etc., as well as to outline and provide basic data for the system of mutual aid associations for local public employees, etc.

Statistical Abstract on Mutual Aid System for Private Schools The Statistical Abstract on the Mutual Aid System for Private Schools is published annually by the Promotion and Mutual Aid Corporation for Private Schools of Japan as a handbook on the status of application of the private school personnel mutual aid system and statistics on short-term benefit

programs, pension benefit programs and welfare programs.

Annual Report on National Health Insurance This report is published every year by the Ministry of Health, Labour and Welfare to grasp the status of national health insurance programs (number of subscribers, medical expenses, balance of payments, status of insurance premiums (taxes), etc.) and to provide basic data for the sound management of the national health insurance system.

Annual Report on Employees' Pension Insurance and National Pension This report is published annually by the Ministry of Health, Labour and Welfare to grasp the status of employees pension insurance and national pension programs and to be used as basic data for the proper management of the employees pension insurance and national pension system.

Financial Status of Employees Pension Fund The Financial Status of the Employees Pension Fund is published every year by the Ministry of Health, Labour and Welfare as basic data for grasping the financial management conditions of the Employees Pension Fund (application, benefits, reserves, etc.) and for its appropriate management. Based on financial statements submitted by the Employees Pension Fund, the Ministry of Health, Labour and Welfare compiles the status of application, benefits and reserves for each fiscal year.

Statistics on Farmers' Pension Fund Statistics on the Farmers' Pension Fund are summarized according to a new system and an old system. The statistics are published annually by the Farmers' Pension Fund.

Annual Business Report of Employment Insurance This report is published annually by the Ministry of Health, Labour and Welfare to grasp the status of application and benefits of employment insurance for appropriate management of the employment insurance system and to be used as basic data for employment measures, etc.

Report on Long-Term Care Insurance for Elderly The purpose of Report on Long-Term Care Insurance for Elderly is to grasp the implementation status of long-term care insurance projects along with the implementation of the long-term care insurance system and to obtain basic data for contributing to the smooth operation of the long-term care insurance system in the future. For this purpose, the Ministry of Health, Labour and Welfare compiles nationwide figures reported by insurers (municipalities, etc.) and publishes monthly (provisional figures) and annual reports. This chapter covers application and payment of insurance proceeds from the annual report.

Annual Business Report on Workers' Accident Compensation Insurance This report on the Industrial Accident Compensation Insurance Program is published annually by the Ministry of Health, Labour and Welfare. This report provides a consolidated summary of the application status, collection status of insurance premiums, payment status of insurance benefits, number of pension recipients, and other data for the Industrial Accident Compensation Insurance Program.

Statistics on Accident Compensation for National Public Employees These statistics are compiled by the National Personnel Authority from reports submitted by the Cabinet Office and each Ministry and are published annually for the purpose of assessing the implementation of compensation and welfare services for national public employees in regular service and providing basic data for the operation of the accident compensation system.

Statistics on Accident Compensation for Local Public Employees These statistics are published annually by the Fund for Local Government Employees' Accident Compensation. They compile the status of recognition of accidents involving public service and commuting, as well as the status of compensation and welfare programs.

Survey of Social Welfare Institutions This survey is conducted every year by the Ministry of Health, Labour and Welfare with the aim to clarify the number of the nationwide social welfare institutions, conditions of inmates and personnel and obtaining basic data for the promotion of social welfare policy. The survey is conducted for social welfare institutions about types of the nationwide social welfare institutions as of 1 October. A detailed survey has been investigated every three years, and a simplified survey in those years between the two detailed surveys. The survey questionnaires consist of a basic and detailed questionnaire. Since the 2018 survey, the detailed questionnaire has been shifted from a complete survey to a sample survey.

Report on Social Welfare Administration and Services This Report is conducted by the Ministry of Health, Labour and Welfare to clarify the actual administrative performances based on the social welfare laws and regulations in the prefectures, designated cities and core cities, and to obtain basic data for the implementation of national government and local public agencies social welfare policy. The survey covers 13 administrative areas, including welfare for the physically disabled, integrated support for persons with disabilities, welfare for persons with intellectual disabilities, and child welfare, and is compiled every year in monthly and annual reports through the governments of prefectures, designated cities, and core cities. For fiscal 2012, the topics related to livelihood protection are integrated into the Survey on Public Assistance Recipients.

Child Allowance Annual Report This report compiles the status of the implementation of the child allowance program. It is published annually by the Children and Families Agency (Up to fiscal 2021, it is published by the Cabinet Office) based on reports on the status of the provision of the child allowance submitted by prefectures, ministries and agencies. Based on the Child Allowance Act (in fiscal 2010 and 2011, the allowance under the name of "*Kodomo teate*" based on two acts legislated for this allowance), the child allowance has been implemented since 1972 with the aim of contributing to the stability of life at home, etc. and achieving stable living for families, etc. to help them bring up healthy children who will lead the next generation, based on the fundamental recognition that parents and other custodians have the primary responsibility for childrearing.

Annual Report on Medical Care for the Elderly in the Latter-Stage This report is compiled based on reports on the status of medical care programs for the elderly aged 75 or over, etc. from extended federations for latter-stage elderly medical care. The Ministry of Health, Labour and Welfare publishes monthly reports (preliminary reports) and annual reports (final reports) for the purpose of identifying the business conditions of the medical care system for the elderly aged 75 or over and providing basic data for its sound management.

Comprehensive Survey of Living Conditions (Fundamental Statistical Survey) This survey is conducted by the Ministry of Health, Labour and Welfare with the aims of researching the basic conditions of the lives of the citizenry such as health, medical care, welfare, pension, and income; obtaining basic data for the planning and drafting of policies related to functions under the jurisdiction of the Ministry of Health, Labour and Welfare; and establishing parent samples to extract survey objects for various surveys. It was initiated in 1986 by consolidating "Basic Survey for Welfare Policy", "National

Health Survey", "National Living Situation Survey" and " Basic Survey for Health and Hygiene". Large-scale survey is conducted every three years and small-scale survey is conducted in each interim year of large-scale survey year. The 2020 survey was suspended from the viewpoint of measures against the coronavirus disease 2019 (COVID-19).

Survey of Institutions and Establishments for Long-term Care The Survey of Institutions and Establishments for Long-term Care is conducted every year by the Ministry of Health, Labour and Welfare in conjunction with the start of the Nursing-Care Insurance System, with the aim to obtain the basic information needed for the base development for the nursing-care service supply. The Survey covers nursing-care facilities, establishments for in-home services, Establishments for community-based services and establishments for assistance for in-home nursing-care. The survey was conducted as of 1 October.

Survey on Public Assistance Recipients This survey is conducted by the Ministry of Health, Labour and Welfare with the aim to clarify conditions of receiving public assistance for household which are receiving or have received public assistance under Livelihood Protection Act and obtaining basic data needed for planning and management of the livelihood protection system and administration on health, labour and welfare. The survey consists of a monthly and annual survey, and this chapter covers the monthly survey. The monthly survey is based on reports on specified items from prefectures, designated cities, core cities and welfare offices regarding the situation during the survey month. For fiscal 2012, the topics related to livelihood protection included in the Report on Social Welfare Administration and Services and those of the national survey on public assistance recipients were consolidated, and a new name, Survey on Public Assistance Recipients, was given.

See the Glossary for Terms in this chapter.
