25 Education

This chapter covers school education and social education.

For school education, statistics on the fundamental elements of school education such as the number of schools, students enrolled, teachers, etc. as well as educational expenditure are presented.

For social education, statistics on personnel engaged in social education, and on institutions for social education such as citizen's public halls are presented.

For educational expenses in the household expenditure, see "22 Family Income and Expenditure", and for statistics on libraries and museums, see "26 Culture".

School Basic Survey (Fundamental Statistical Survey) This survey has been conducted annually since 1948 by the Ministry of Education, Culture, Sports, Science and Technology for the purpose of obtaining basic data for school education administration by researching basic matters related to schools such as the number of schools, number of students enrolled, number of graduates, number of teachers, school facilities, school expenditures, status after graduation, etc. The survey comprises six survey components, i.e. survey on school particulars, correspondence courses, school-age children not attending school, school facilities, school expenditures, and on the first destination of new graduates. The survey is conducted at kindergartens, integrated centres for early childhood education and care, elementary schools, lower secondary schools, compulsory education schools, upper secondary schools, secondary schools, schools for special needs education, universities, junior colleges, colleges of technology, specialised training colleges and miscellaneous schools as of 1 May (or previous fiscal year for the survey on school-age children not attending school and school expenditures).

Survey of Social Welfare Institutions See "23 Social Security". This chapter covers the number of day nurseries along with their workers and infants enrolled by prefecture, as well as the number of regional childcare facilities along with their workers and infants enrolled by prefecture.

Basic Survey of Educational Corporations and Basic Survey of Educational Corporations and Others These surveys are conducted annually by the Promotion and Mutual Aid Corporation for Private Schools of Japan to provide basic and reference materials for the operations of the Corporation, as well as materials for budget requests related to private schools, by identifying the financial and educational conditions of private schools and to provide them as reference materials for the management of educational corporations. The Basic Survey of Educational Corporations covers universities, junior colleges, colleges of technology, upper secondary schools, secondary schools, lower secondary schools, compulsory education schools, and elementary schools. The Basic Survey of Educational Corporations and Others covers educational corporations and other corporations and individuals who establish schools for special needs education, kindergartens, specialised training colleges, and miscellaneous schools. Financial data are compiled as "Current Private school Finances". This chapter covers revenue and expenditure for kindergartens, elementary schools, lower secondary schools, upper secondary schools, special needs education, junior colleges, and universities (Schools are treated as accounting units as stipulated by articles 13 and 24 of the Accounting Standard for educational corporations.).

Survey of Local Educational Expenditure The Survey of Local Educational Expenditure has been conducted by

the Ministry of Education, Culture, Sports, Science and Technology since 1949 with the aim of clarifying the actual state of expenses disbursed along with tuition fees and other income received by local governments for school education, social education, lifelong learning, and educational administration, as well as the actual organisational state of local educational administrative organisations, and obtaining basic data for studying and formulating educational policies through the national and local governments. The survey consists of a survey on local education expenditure conducted every year and a survey on educational administration conducted every other year. This chapter covers the results of the survey on local education expenditure. The survey on local education expenditure includes prefectural kindergartens, integrated centres for early childhood education and care, elementary schools, lower secondary schools, compulsory education schools, special needs education, upper secondary schools, secondary schools, specialized training colleges, miscellaneous schools, colleges of technology (excluding those established by public university corporations), and boards of education and covers the fiscal year preceding the one in which the survey is conducted.

Survey of Household Expenditure for Children's Education This survey has been conducted by the Ministry of Education, Culture, Sports, Science and Technology every other year since 1994 for the purpose of obtaining basic data for studying and drafting national policies on educational expenses by grasping the actual conditions of expenses for school education and out-of-school activities, the annual income of households, the situation of parents and siblings, etc. The survey targets parents who send their children to public or private kindergartens, elementary schools, lower secondary schools, and upper secondary schools. (The survey was suspended in fiscal 2020 due to the impact of the COVID-19 pandemic but has been resumed every other year since fiscal 2021.) The survey covers one year from April of the year in which it was conducted. The survey covers expenditures over three periods: April-June, July-November, and December-March.

An Outline of the School Textbook System in Japan This outline is compiled by the Ministry of Education, Culture, Sports, Science and Technology with regard to the definition, screening, adoption, publication, and free provision of textbooks. This chapter covers the number of textbooks in demand and the number of titles are listed for elementary schools, lower secondary schools, upper secondary schools, and special needs education.

Social Education Survey (Fundamental Statistical Survey) This survey has been conducted every three to five years since fiscal 1955, and every approximately three years since fiscal 1975 by the Ministry of Education, Culture, Sports, Science and Technology, for the purpose of clarifying basic elements related to social education needed for social educational administration. The fiscal 2021 survey was composed of several component surveys on the administration of social education, on citizen's public halls, on libraries, on museums, on educational facilities for children and youths, on women's educational centres, on physical education facilities, on theaters, on music halls, and on lifelong learning centres. Each survey covers prefectural and municipal boards of education (including boards of education in special wards) or the relevant social-education-related facilities as a complete survey as of 1 October (the previous fiscal year for the status of implementation of social education projects, etc.).

See the Glossary for Terms in this chapter.

詳細票が回収できた施設のうち、活動中の施設について集計。推計値 1) 保育所型認定こども園を含む。 2) 小規模保育事業所、家庭的保育事業所、居宅訪問型保育事業所、事業所内保育事業所を含む。 3) 保育部分のみ。令和6年9月末現在

Figures are calculated about the institutions currently active, among the institutions which the questionnaire could be collected. Estimated values. 1) Including the authorised nursery-type children's centres. 2) Regional childcare facilities. Including the small-scale day-care services, family style day-care services, home-visit support services and employer-provided childcare services. 3) Childcare only. As of the end of September 2024.
