1) Including miscellaneous manufacturing industries. 2) For 2005, excluding manufacturers of apparel and other finished products made from fabrics and similar materials. 6) Value of total cash wages and salaries. For 2011, labour cost of persons engaged in the business, excluding cost borne for those who are seconded or dispatched to another establishment under separate management. 7) Establishments with 30 or more employees. For 2005 and 2011 the value of production is for establishments with 10 or more employees. 8) For those establishments with 29 or fewer employees, representing gross value added. 9-4 ESTABLISHMENTS, PERSONS EMPLOYED, VALUE OF TOTAL CASH WAGES AND SALARIES, COST OF RAW MATERIALS, FUELS AND ELECTRICITY CONSUMED, AND SUBCONTRACTING EXPENSES FOR CONSIGNED PRODUCTION, VALUE OF MANUFACTURED GOODS SHIPMENTS AND VALUE ADDED IN MANUFACTURING BY SIZE OF PERSONS EMPLOYED AND MEDIUM INDUSTRY GROUP (2005~13) (Cont'd)

Persons employed refer to the regular employees, working proprietors and unpaid family workers. Value of total cash wages and salaries refers to the total amount of basic wages, basic allowances, special allowances (year-end bonus etc.), retirement allowances or discharged allowances, payments to workers dispatched from other companies, wages for temporary workers, payments to workers dispatched to other companies, etc. Cost of raw materials, fuels and electricity consumed, and subcontracting expenses for consigned production refers to the total of the value of raw materials, fuels and electricity consumed (excluding electric power generated at private plants), subcontracting expenses for production outsourcing, expenses related to outsourcing of support functions (excluding for 2005), and purchases for resale (excluding for 2005), including consumption tax. Value of manufactured goods shipment is the total value of manufactured goods shipments, receipts for production done to others, shipments for scraps and salable refuse, and other revenue, including internal tax on consumption and consumption tax. Value added = (value of manufactured goods shipments) + ((stock of manufactured goods at the end of the year) - (stock of manufactured goods at the beginning of the year)) + ((stock of goods in process at the end of the year) - (stock of goods in process at the beginning of the year)) - (internal tax (except consumption tax) + (estimated consumption tax)) - (cost of raw materials, fuels and electricity consumed, and subcontracting expenses for consigned production) - (value of depreciation). However, for 2005, (value added) = (value of production) - (internal tax (except consumption tax) + (estimated consumption tax)) - (cost of raw materials, fuels and electricity consumed, and subcontracting expenses for consigned production) - (value of depreciation).
