Preface

The System of Social and Demographic Statistics of Japan is the systematic compilation of statistical data collected and processed by districts demonstrating the real living conditions of the country's population.

This report presents major basic data from the municipalities data compiled under the system. It consists of two parts: "I Basic Data" and "II Explanation of Terms".

I hope that this report will be widely used in various fields for administrative policy, academic research, regional analysis etc.

Furthermore, we have also published "Social Indicators by Prefecture" and the "Statistical Observations of Prefectures". All contents of these reports are accessible from the web site of the Statistics Bureau, Ministry of Internal Affairs and Communications or the Portal Site of Official Statistics of Japan (e-Stat).

Notes

1. Presented fiscal years
In principle, the fiscal years adopted for basic data posted in this report are the latest ones from data collected until the Japanese fiscal year of 2021, and are shown in the year of the Christian era.
2. Time span
The time span is based on the Japanese fiscal year, i.e. from 1 April to 31 March, and data on the report refer to the period or date of the fiscal year indicated at the top of the relevant table. Note, however, that data for which the period extends over two fiscal years are assumed to belong to the fiscal year that occupies a longer period than the other.
3. Data
 - (1) Basic data figures may not add up to the totals due to rounding or in case of inclusion of data not available.
 - (2) The total (Prefecture and ku-area of Tokyo) includes data for an area with undetermined administrative boundaries. Hence basic data figures may not add up to the totals in case.
(Applicable parts : B1101, B1103, C2107~C2212, C3501~C3503, H6130~H6133)
4. Symbols
 - 0 : Data is 0, or less than specified unit.
 - ... : Not available
 - x : Figures kept undisclosed
5. Handling of municipalities readjusted by mergers or divisions
Municipalities posted in this report are based on their name and district at 31 March, 2021.
Data are shown as below in municipalities readjusted by mergers, divisions before 31 March, 2021.
 - (1) Cities and towns where reorganization was implemented, or which were renamed
Data are shown in the municipalities name at 31 March, 2021.
 - (2) Merged municipalities
In the case of municipalities newly established by a merger or transferred and incorporated to other municipalities, data are expressed as the sum of the data regarding the municipalities concerned. However, if data are not available in one or another municipalities, data are shown as "...".
 - (3) Municipalities divided, newly established, etc.
In the case of municipalities having been newly established after being divided, data are expressed without change when keeping the same name after the division, and data for the fiscal year before the division are expressed as "...".
 - (4) Data posted in this report is from 1 July, 2014 onward, and municipalities are posted at administrative district readjusted from 1 July, 2014 to 31 March, 2021.

Appendix Outline of the System of Social and Demographic Statistics of Japan

1. The System of Social and Demographic Statistics of Japan

The System of Social and Demographic Statistics of Japan is a system in which statistical data in a wide range of fields are collected, normalised and organised. The system describes the lives of Japanese people in various fields. The purpose of the system is to provide basic data useful for various kinds of administrative programmes, policy-making and analysis of regional differences. It was started by the Statistics Bureau in fiscal 1976.

What is characteristic of the system is that the data are organised for each of the prefectures (*To*, *Do*, *Fu* and *Ken*) and municipalities (*Shi*, *Ku*, *Machi* and *Mura*), thus enabling regional comparison and analysis.

2. Basic Data collected in the System

In the system, basic data are collected in 13 fields from “A. Population and Households” to “M. Daily Time”. The number of basic data items is about 2,750 for prefectures, about 660 for *Shi* and *Ku*, and about 640 for *Machi* and *Mura* respectively (as of fiscal year 2021).

3. Compilation of the System

The system is compiled by the following process:

- (1) Determination of basic data to be collected
- (2) Collection of basic data
 - Statistical Data quoted from report books and computer-readable media
- (3) Input and evaluation of basic data
- (4) Systematisation of basic data and indicator calculation
- (5) Provision of the results by report books, computer readable media, and online

4. Dissemination of the Data of the System

Data organised in the system are provided in computer readable media and publications, for free online.

- (1) Computer readable media
 - Basic Data by prefecture (time series from 1975)
 - Basic Data by municipality (time series from 1980)
 - Data in “*Social Indicators by Prefecture*”
 - Data in “*Statistical Observations of Prefectures*”
 - Data in “*Statistical Observations of Municipalities*”
- (2) Publications
 - *Social Indicators by Prefecture* (2022 edition) (bilingual, published annually; 581 social indicators and 549 basic data)
 - *Statistical Observations of Prefectures* (2022 edition) (bilingual, published annually; 431 social indicators)
 - *Statistical Observations of Municipalities* (2022 edition) (bilingual, published annually; 93 basic data for municipalities)
